ROOSTER

ROOSTER®, FOUNDED BY STEVE COCKERILL IN NOVEMBER 1999, EMERGED FROM SALTY SEAS AND SHORESIDE CONVERSATION ACROSS THE WORLD; COMBINING HIS PASSION FOR DEVELOPING WATER SPORTS KIT THAT PERFORMS WITH HIS ENTHUSIASM FOR SHARING THE KNOWLEDGE AMASSED FROM TWO OLYMPIC CAMPAIGNS. OUR VERY ORIGIN IS INNOVATION AND CHALLENGING THE SYSTEMS, NOT JUST A BRAND; BUT PRACTICES DELIVERED FROM DETERMINED EFFORT, THOROUGH RESEARCH AND PASSION FOR THE OUTDOORS.

# ENJOYING THE OUTDOORS SHOULDN'T COST THE EARTH...

## ROOSTER'S RESPONSIBILITY

We all have a duty to protect the environment and develop our communities. As an outdoor brand, we must play a strong role in looking after the stadium in which we play, compete and live. We have come from Sailing and that in itself is about making the most efficient use of the elements and enjoying nature without inhibiting it.

Rooster are committed to ethical and sustainable business practices. We take account of our social, economic and environmental impact. We aim to be beneficial to the planet, our employees, customers and communities.

## ENVIRONMENTAL STEPS

We design products to perform and last even at the very peak level of the sport. No stone is left unturned in the research and testing for new product development. We regularly update our existing products and reassess them for performance, longevity and their environmental footprint. Product care information is included on our website care page and on all product labelling. We take these steps to make sure that they are excellent value, that they last for a very long time and are among the best on the market.

We have utilised recycled polyester in more and more of our products as a step towards our long term sustainability plan, and more recently recycled coffee beans. We aim to reduce our impact on the environment by minimising our dependence on some traditional raw materials that can release harmful chemicals and emissions. Recycled polyester is made from consumer recycled plastic items such as single-use plastic bottles and other plastic packaging.

We have designed our latest Womens Seagrass range to raise money and awareness for the Seagrass Project - See page 22.

## PACKAGING

Our use of plastic is on the rapid decline, and our investigation into reducing our plastic use is ongoing. We are introducing recycled/lighter weight/smaller packing bags on the occasion where plastic packaging is still necessary, and have made big leaps into the reduction of our plastic use. Our Buoyancy Aids, Boots, Trapeze Harness and Harness back pad all come in reusable mesh bags with absolutely no plastic packaging. All boxes are reused in the warehouse as customer packing boxes, or recycled if unusable.

All our packaging is now in the process of dramatic change. We are reducing the amount of cardboard for our sailing boots and shoes, a thinner card with no lid and a reusable boot bag over the top.

We have developed a new 'bag for life' to be used at events, shows and for Rooster HQ collections. These will replace any plastic bags, and are built to be reused.

## SOCIAL STEPS

Rooster always aim to work closely with organisations close to our core values. We have been partnered with the SailGP team for the last couple of years on their Inspire programme, as part of our global initiative to make sure that the ability to enjoy and appreciate the water is available for those who don't get the opportunities we often take for granted. Travelling with SailGP Inspire we get to meet and coach kids all around the world, get them the kit that keeps them on the water and spread the enjoyment, thrill and respect for the sea.

We support a number of sailors at very different stages from grassroots to professionals, all ages and abilities, we aim to give our best support to those who need it the absolute most. We have a number of local and UK based Ambassadors with the majority reaching the farthest corners of the world; Guatemala, Israel, South Africa, Poland, Argentina, Japan, Finland and many more. We aim to support athletes from countries that do not have as much support for their sport readily and easily available. We do our best to implement new ideas in those areas supporting the very people who inspire so many others to get out and enjoy the water.

# NEW & COMING SOON

WHAT YOU'VE BEEN WAITING FOR...

## ACTIVE AQUAFLEECE® TOP

**Colour:** Signal Blue, Black, Flo Yellow, Teal, Orange

**Size Range:** XS, S, M, L, XL, 2XL, 3XL

This top has a large front zipper for ventilation. The panels at the upper body and shoulders has been designed to allow extra space for a large range of movement. Aquafleece® utilises a water resistant, durable & flexible polyurethane coating on the outside, with a fleece inner layer - a combination that works well when wet or dry. Un-taped seams so that the top can be more breathable, but the overlock seams still protects you from rain and spray.

### Features:

- Water resistant construction
- Soft light fleece lining for warmth and comfort in all climates
- Seams are not taped so perfect crossover top for a range of temperatures
- Large zip opening at front for instant venting
- Elasticated adjustable neck bungee - adjusts from back
- Elastic adjustment around hem
- Adjustable Velcro cuffs
- Handy pocket inside chest
- Seams and panel layout fit well for unisex wear

### Materials:

- Rooster PU laminated and bonded light fleece
- Composition: 88% Polyester, 12% PU

## AQUAFLEECE® ROBE

**Colour:** Black - Blue Lining, Black - Red Lining, Khaki Green - Black Lining.

**Size Range:** Junior, Adult

**The first watersports robe with a removable lining\*** - for easy cleaning/drying. Oversized, warm and versatile jacket with removable quick drying teddy fleece lining - the perfect jacket for warming up after a sports activity. Waterproof, windproof and durable due to Rooster's iconic Aquafleece® fabric outer shell. The soft and fluffy teddy lining at the inside of the robe can be fully removed from the jacket, giving you the ability to wash it and keep it fresh, and bonus it is made from recycled polyester!

### Features:

- Waterproof fabric with taped seams
- Soft bonded fleece to the inside surface of the Aquafleece® outer shell
- Fully removable lining
- Soft fluffy teddy quick dry lining
- Fleece lined hand pockets
- Adjustable Velcro cuffs

### Materials:

- Rooster PU laminated and bonded fleece (88% Polyester, 12% PU)
- Recycled Polyester Lining

## SUPERTHERM® 5/4/3MM CHEST-ZIP STEAMER

**Colour:** Black/Melange

**Size Range:** Junior, XS, S, M, L, XL, 2XL, 3XL

Built for superior warmth, unrestricted movement and total comfort when in the water. Featuring our quick-dry thermal lining on the chest and back panel with super low density neoprene used throughout to give maximum movement with ultimate insulation. The entire suit is glued and blind stitched to prevent cold water flushing with the addition of flexible neoprene tape on high wear seams to improve durability.

### Features:

- 5/4/3mm 4 way Super Stretch Neoprene
- GBS (glued, blind stitched) and seam sealed to prevent cold water flushing
- Inner plush fleece with quickdry thermal lining on chest and back panel
- Unrestrictive fit and flex with pre bent joints.
- Front-zip chest entry
- Duratex wear resistant knees and seat

### Materials:

- Superterm® Superstretch Neoprene
- Superterm® soft quick dry lining
- Duratex seat and knee panels

## SOFTSHELL JACKET WITHOUT HOOD

**Colour:** Black

**Size Range:** JS, JL, XS, S, M, L, XL, 2XL, 3XL, 8, 10, 12, 14, 16, 18

Versatile all-year-round layer that is hard wearing, wind proof and water repellent. These properties combined with its bonded fleece lining make it perfect as a top layer, but you can also use as a mid layer for a heat boost on colder wet days. The bonded fleece lining throughout makes it super snug with minimal bulk. The 100% twill polyester stretch bonded fabric with TPU membrane not only makes it flexible but water resistant as well to 8000mm and breathable to 3000 mvp.

### Features:

- Slim fit - shaped at back for more coverage
- Fleece bonded lining
- Fleece lined hand pockets
- Internal pocket
- Chest pocket with mesh lining
- Adjustable cuffs with hook and loop closure
- Adjustable drawcord around bottom of jacket

### Materials:

- 100% Twill Polyester 8000mm/3000mvp
- Fleece bonded lining

## ROOSTER® T-SHIRT

**Colour:** Light Grey, Petrol Blue

**Size Range:** JS, JM, JL, XS, S, M, L, XL, 2XL, 3XL, 8, 10, 12, 14, 16, 18

Technical in fabric with quick drying and UV50+ properties, yet in appearance it looks and feels like a t-shirt that you can wear for everyday style. This will quickly become your favourite t-shirt for the active person. Great for changeable lifestyles and for when you are at work but then make an impulsive decision to go out on the SUP, to the gym or for a run - this t-shirt will perform to its best.

### Features:

- Short sleeved
- Scooped Round neck
- Shaped hem for a more flattering fit
- Textured fabric aesthetic
- Quick drying
- UV50+ protection
- Loose fit

### Materials:

- 100% Recycled Polyester

## RASH TOP LONG SLEEVED BLUE SEAL

**Colour:** Navy/Blue Seal

**Size Range:** XS/S, M/L, XL/2XL, 3XL/4XL

Spandex Lycra rash vest with UV50+ protection. The raglan sleeve design gives a fresh addition to your kit bag. The perfect cooling layer to wear under your neoprene layers or on its own as a protective layer against the sun rays. Our blue seal pattern is inspired by nature, to be worn and enjoyed in nature! We've taken elements from the skin texture of a seal translated onto the print.

### Features:

- Black underarm and side panels
- Navy chest and back panels
- Long sleeved Blue seal patterned arm protection
- High neck
- UV protection
- Unisex fit

### Materials:

- Nylon Spandex
- 200gsm

## BAMBOO REUSABLE CUP

**Colour:** Red, Grey

**Size Range:** 470ml

Great for travelling, our reusable cup is suitable for hot and cold drinks, and comes with a silicon lid and a handy heat resistant silicon sleeve to make it more comfortable to hold with hot drinks. The main cup is made from eco-friendly bamboo fibre combined with cornstarch and resin, reusable and biodegradable at the end of its life.

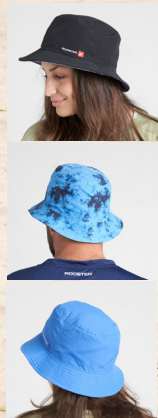

**Features:**

- Silicon sleeve and lid
- Dishwasher Safe
- Microwave Safe
- Suitable for hot and cold drinks
- 470ml capacity
- Eco-friendly Bamboo cup

**Materials:**

- Cup: 30% Bamboo Fibre, 20% Corn Starch, 50% Resin.
- Sleeve and lid: Silicon

## REVERSIBLE BUCKET HAT

**Colour:** Black/Grey, Navy/Blue Seal, Signal Blue/Seagrass

**Size Range:** One Size

This hat is designed with versatility at its core with its reversible feature, you can choose your style based on your mood – patterned or plain...your choice. The classic comfortable fit means this hat should not be too tight, and with 360 degree coverage gives you all round shade protection in this hat.

**Features:**

- Quick Drying
- Reversible – choice of 2 styles to wear
- 360 degree 55mm brim
- Lightweight and packable
- Printed logo
- UV50+ Protection

**Materials:**

- 100% Nylon

# NEW ACCESSORIES

# ALL NEW SUNGLASSES

**POLARISED, FLOATING SUNGLASSES**  
DEVELOPED IN 3 DIFFERENT STYLES TO SUIT  
EVERY SPORT, ON AND OFF THE WATER

## CLASSIC FLOATING SUNGLASSES

**Colour:** Black frames, Orange mirror Revo lens

**Size Range:** One Size

Our 'classic' shape floating sunglasses have been designed with everyday style in mind. They are great for use during sports due to their technical specification, whilst also being perfect for road use and driving. They have a red/orange two tone Revo Polarised lens, rubber ends to the arms for comfort on the ears and a comfortable rubber nose piece. Constructed with a TR90 frame, extremely comfortable because of their flexible quality, whilst still highly durable. Polarised lenses to block glare from the water, anti-fog technology, EN ISO 12312-1 rated to reduce eye fatigue and provide protection against solar radiation, Filter Cat 3 providing high protection against sun glare (only 8-18% light transmittance).

**Features:**

- UVA/UVB 100% Protection
- Polarised lenses
- Floating TR90 Frame
- Anti-Fog
- Anti-Glare
- Hydrophobic Coating repels water
- EN ISO 12312-1:2013
- Filter Cat 3
- Rubber nose piece
- Comfortable tapered rubber arm ends for extended comfort on your ears
- Red/Orange two tone Revo Mirror Lens

## SPORTS WRAP-AROUND FLOATING SUNGLASSES

**Colour:** Black frames, smoke mirror lens

**Size Range:** One Size

The perfect solution to unlimited vision, whilst protecting you from the wind with their wrap around fit. Constructed with a TR90 frame, extremely comfortable because of their flexible quality, whilst still highly durable. Polarised lenses to block glare from the water, anti-fog technology, EN ISO 12312-1 rated to reduce eye fatigue and provide protection against solar radiation, Filter Cat 3 providing high protection against sun glare (only 8-18% light transmittance).

**Features:**

- UVA/UVB 100% Protection
- Polarised lenses
- Floating TR90 Frame
- Anti-Fog lens technology with additional ventilation in top of lens
- Anti-Glare
- Hydrophobic Coating repels water
- EN ISO 12312-1:2013
- Filter Cat 3
- Rubber nose piece
- Comfortable tapered rubber arm ends for extended comfort on your ears
- Smoke Mirror Lens

## BI-FOCAL FLOATING SUNGLASSES

**Colour:** Black, Smoke lens

**Size Range:** One Size

Providing the ultimate solution with a bi-focal lens in the bottom part so you can read your watch, garmin, the race course and fill in the registration form without worry. Rated to +1.5 magnification strength. Constructed with a TR90 frame, extremely comfortable because of their flexible quality, whilst still highly durable. Polarised lenses to block glare from the water, anti-fog technology, EN ISO 12312-1 rated to reduce eye fatigue and provide protection against solar radiation, Filter Cat 3 providing high protection against sun glare (only 8-18% light transmittance).

**Features:**

- UVA/UVB 100% Protection
- Polarised lenses
- Floating TR90 Frame
- Anti-Fog
- Anti-Glare
- Hydrophobic Coating repels water
- EN ISO 12312-1:2013
- Filter Cat 3
- Bi-Focal Lens +1.5 Magnification
- Rubber nose piece
- Comfortable tapered rubber arm ends for extended comfort on your ears
- Smoke Lens

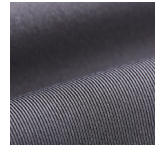

# HOT STUFF

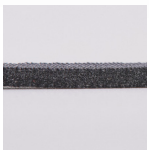

Heat boosting base layer, this 0.5mm titanium lined neoprene is a clever material that works with your body to regulate your temperature. The titanium lining reflects heat from your body back onto your body, rather than letting it escape through the fabric.

## OUTSIDE SURFACE

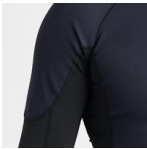

## NEOPRENE

## LINING

## STITCHING

## HOT TOP

**Colour:** Black

**Size Range:** Junior Small, Junior Large, XS/S, M/L, XL/2XL, 3XL/4XL, 6/8, 10/12, 14/16, 18/20

Our 'hottest' base layer in the range, this thermal top uses a combination of two of our most popular fabrics. The main 'heat' boosting properties of this top derive from its 0.5mm titanium lined neoprene used at the chest, back and upper arms. This fabric is a clever material that works with your body to regulate your temperature, where the titanium lining reflects heat from your body back onto your body, rather than letting it escape through the fabric. Through combining this 'Hot' fabric with our soft and stretchy Polypro™ on panels where you want the maximum movement and breathability, underarms, sides, neck and lower arms, this top is set for thermal comfort and performance.

### Features:

- Titanium lined 0.5mm 'Hot' neoprene at main body and upper arms
- Polypro™ fabric at sides, underarms, neck and lower arms
- Scooped hem at back for a flattering fit
- Thumb loops at cuffs
- Double lined high neck Polypro collar
- 4 way stretch

### Materials:

- Titanium lined 0.5mm neoprene
- Polypro™

## HOT LEGS

**Colour:** Black

**Size Range:** Junior Small, Junior Large, XS/S, M/L, XL/2XL, 3XL/4XL, 6/8, 10/12, 14/16, 18/20

Our 'hottest' base layer in the range, these thermal leggings use a combination of two of our most popular fabrics for the utmost comfort and thermal performance. The main 'heat' boosting properties derive from its 0.5mm titanium lined neoprene used at the upper front legs, seat and back of legs. This fabric is a clever material that works with your body to regulate your temperature, where the titanium lining reflects heat from your body back onto your body, rather than letting it escape through the fabric. Through combining this 'Hot' fabric with our soft and stretchy Polypro™ on panels where you want the maximum movement and breathability, crotch/gusset, waistband and upper sides, these leggings will give unrestricted performance.

### Features:

- Titanium lined 0.5mm 'Hot' neoprene at upper front legs, seat and back of legs
- Polypro fabric at crotch/gusset, waistband and upper sides
- High fit contoured elasticated waistband
- Double lined Polypro panel at crotch
- 4 way stretch

### Materials:

- Titanium lined 0.5mm neoprene
- Polypro™

## HOT SOCKS

**Colour:** Black

**Size Range:** 2XS, XS, S, M, M/L, L, XL, 2XL

A revolution in warmth - a 0.5mm titanium layer that is both comfortable and warm. Wear them under your normal boots for extra warmth - remember layers are better than thickness! Titanium neoprene acts in a similar way to a survival blanket, the titanium impregnated reflective layer is sandwiched between the neoprene and the interior nylon lining, this lining reflects radiated heat back to the body.

### Features:

- Thin neoprene socks with 0.5mm Titanium impregnated reflective layer
- Provide additional warmth by reflecting heat back to the body
- Layer up with PolyPro Socks

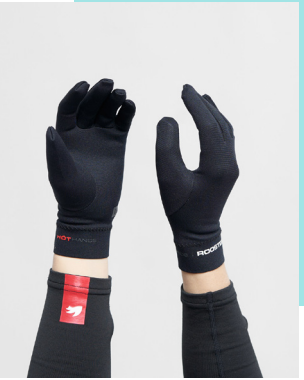

### Materials:

- Titanium lined 0.5mm neoprene

# IN STOCK NOW

LONG-TERM HEAT BOOSTING FAVOURITES

## HOT HANDS GLOVE LINERS

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

Minimalistic lightweight titanium lined 0.5mm neoprene glove. Being made from neoprene, these gloves will give provide some insulation, where the titanium impregnated reflective lining reflects heat back to your body - in a similar way to a survival blanket. Perfect to be used on their own for cycling, walking, running, etc or as a liner to give a heat boost underneath your sailing, cycling, motorbike, skiing and other gloves.

### Features:

- Flexible, adaptable, neoprene gloves with 0.5mm Titanium impregnated reflective layer.
- Double layer cuff for support and comfort
- Minimalistic glove
- 4 way stretch

### Materials:

- Titanium lined 0.5mm neoprene

# POLYPRO™

## THE ULTIMATE SPORTS BASE LAYER

Rooster Polypro™ is a long-term and thoroughly developed staple of thermal base layer comfort and protection. Constructed from a combination of Polypropylene (94%) and Elastane (6%). The brushed inner fabric gives it a thick, fleece-like, high quality texture which feels incredibly warm and soft next to your skin. Polypropylene is naturally hydrophobic, which means the fabric feels remarkably dry, even when wet. Wear it next to your skin underneath your neoprene suit, ski suit, drysuit, salopettes or whatever mid-layer your sport requires. Wear it on the water or for winter running, cycling, kayaking, walking - anytime you need a thermal base layer.

## POLYPRO™ TOP

**Colour:** Black

**POLYPRO**

**Size Range:** Junior S, Junior L, XS/S, M/L, XL/2XL

**Features:**

- Breathable Polypropylene material wicks moisture away from the body
- Quick Drying
- Thumb loops at cuffs
- Long length – easy to tuck in to other garments
- Double lined high neck collar

**Materials:**

- 94% Polypropylene, 6% Elastane

## POLYPRO™ LEGGINGS

**Colour:** Black

**POLYPRO**

POLYPRO® GARMENTS

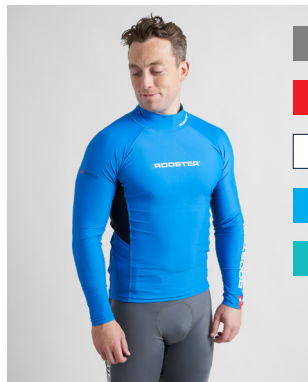

# UV RASH/SPANDEX

Staying protected from the elements is essential when you are out in sunny weather. That is why Rooster has developed quality, comfortable and technical UV rash guards which offer layers of protection against harmful UV radiation.

## RASH TOP-LONG SLEEVED

**Colour:** Grey, Red, White, Blue, Teal

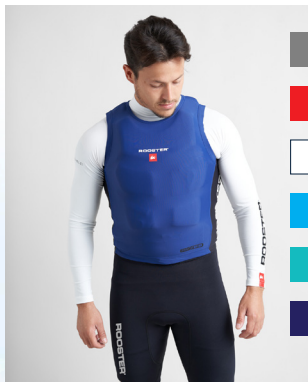

**Size Range:** Junior, XS/S, M/L, XL/2XL, 3XL/4XL

This product is available in different colourways and sizes. The perfect top to wear under your neoprene layers or on its own as a rash guard. These have a UV protection SPF50+.

**Materials:**  
- Nylon Spandex 200gsm

## RACE BIB

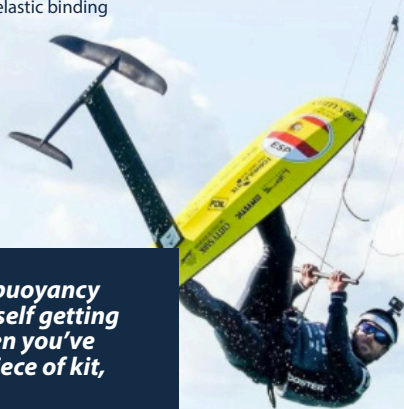

**Colour:** Grey, Red, White, Blue, Teal, Navy

**Size Range:** Small/Medium, Large/X-Large

The Rooster Race Bib is designed to provide a streamlined, catch free fit when worn over the top of a buoyancy aid. The snug fitting lycra stretches over buoyancy aids and trapeze harnesses to minimise snags on sheets, trapeze and control lines and prevent tiller extensions getting hooked underneath shoulder straps.

**Materials:**  
- Nylon Spandex 200gsm  
- Silicon backed elastic binding

*"If you've ever snagged your buoyancy aid on the boom, or found yourself getting caught on other bits of kit then you've learned the hard way. Great piece of kit, worth getting."*

- Jack -

## PRO COMPRESSION BIB

**Colour:** Black/Grey

**Size Range:** S, M, L, XL

The Bib is made from heavy duty wear resistant Spandex with a long length secure fit. Designed to improve performance in high-performance trapeze/dinghy environments through solving several problems; safety, compression/anti catch and trapeze compatibility. Two key features include a safety accessory pocket with tether point for the knife and a trapeze hook compatibility panel. Red stitching and bold white logos at parts aid safety and visibility.

### Features:

- Close, snag free, compressive fit
- Knife pocket at front with easy to open construction
- Neoprene reinforced harness hook panel at centre front
- Strong silicon backed elastic binding at hem for added structure and to prevent bib riding up
- Strong flatlock stitching construction

### Materials:

- Heavy Duty Nylon Spandex 420gsm
- Silicon backed elastic binding

## PRO RASH LEGS

**Colour:** Grey

**Size Range:** JS, JL, XS/S, M/L, XL/2XL

Heavy weight 410gsm spandex leggings with Duratex neoprene knee/shin and seat panels. There is capability to add ProHike pads into the seat part through a hook and loop attachment at the inside surface. The fit has been developed for performance through a high curved waist profile with strong elastic tab adjustment pulling around the sides – perfect to get a secure fit on a range of body shapes.

### Features:

- Duratex seat part with internal ProHike pad attachment capability
- Duratex knee/shin panels with additional padding
- Secure fit waistband with strong elastic tab adjustment
- Curved waist profile for a better fit
- Additional panel at back (above seat panel) for manoeuvrability
- Prebent knees
- UV protective

### Materials:

- 410gsm Nylon Spandex
- Duratex
- Limestone based Neoprene

## RASH LEGGINGS

**Colour:** Grey

**Size Range:** Junior, XS/S, M/L, XL/2XL

Spandex Lycra rash leggings with improved panel layout and construction to give you the ultimate fit for improved comfort. Made with heavy duty 4 way stretch fabric for ultimate UV protection and durability. The perfect layer to wear under your neoprene layers or on their own as a protective rash guard.

### Features:

- Flatlock seams
- Elasticated waist and cuffs on legs
- Discreet Stirrup foot construction
- UV protection

### Materials:

- 310gsm nylon spandex

- UV Protective

**Materials:**

- Nylon Spandex 280gsm

## UV RASH/SPANDEX

### WOMENS RASH TOP LONG SLEEVED

**Colour:** Azure, Seagrass

**Size Range:** 6/8, 10/12, 14/16, 18/20

Long sleeved rash vest, tailored to Women's fit, with Rooster's Seagrass or Azure on the arms. Teal block colour on the front and rear panels with slimming black sides.

**Features:**

- All over blue print on arms
- Black panels at sides create a slimming illusion

**Materials:**

- Nylon Spandex 200gsm (280gsm at arms)

### WOMENS SPORTS BRA/BIKINI TOP

**Colour:** Black/Seagrass, Black/Azure

**Size Range:** 6/8, 10/12, 14/16

Medium Impact Sports Bra/Bikini top in signature Rooster Women's styling. Double layered throughout for added support and a racer back made from mesh enhances breathability. Wide yet soft elastic chest band keeps top securely in place.

**Features:**

- Mesh breathable racer back
- Double lined throughout
- Medium Impact
- Soft Chest band

**Materials:**

- Nylon Spandex 280gsm

### WOMENS HIGH WAIST SPORTS SHORTS

**Colour:** Black/Seagrass, Black/Azure

**Size Range:** 6/8, 10/12, 14/16

High waisted shorts - constructed from heavy weight spandex for extra support. Features a mesh breathable crotch panel making them ideal for sports training as well as for underneath your wetsuit.

**Features:**

- Mesh breathable crotch panel
- Double lined high waisted design for a flattering fit
- Short length

**Materials:**

- Nylon Spandex 280gsm

# THERMAFLEX®

SPRING-SUMMER WETSUIT  
COMFORT & STRETCH

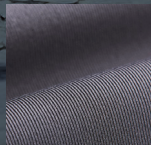

Our mid-lightweight neoprene collection ideal for temperatures ranging from 12-20 degrees Celcius. The Thermaflex® range uses 1.5mm superstretch neoprene. We combine the superstretch neoprene with several different linings and outer surface fabrics to give the best performance in our products. All Thermaflex® products use Flatlock stitching for added durability and to assist in breathability.

We have started to move over to more eco friendly premium materials and linings, with enhanced fit, features, and comfort.

THERMAFLEX®

## THERMAFLEX® 3/2MM FULL LENGTH CHEST-ZIP WETSUIT

**Colour:** Grey/Black/Melange

**Size Range:** Junior L, XS, S, M, L, XL, 2XL

This 3/2mm summer weight chest zip full wetsuit benefits from the soft stretchy Thermaflex® fabrics. 2mm neoprene is used on the arms for improved comfort and manoeuvrability, whilst the body is 3mm to give more protection around your core. We've used our Duratex™ at knees/shin and seat part for extra protection. Perfect for all watersports!

#### Features:

- Front zip - full overhead closure
- Quick dry plush chest lining
- Contoured fit
- Comfortable & unrestrictive; designed with tailored fit
- Flatlock stitching
- Silicon print on inside of ankles
- Reinforced seams at lower legs for capability to cut legs to a shorter length

#### Materials:

- Thermaflex® Super stretch Limestone 3/2mm Neoprene
- Duratex™ seat and knee panels

## THERMAFLEX® 1.5MM LONGJOHN

**Colour:** Grey/Black/Melange

**Size Range:** Junior S, Junior L, XS, S, M, L, XL, 2XL

Made using our upgraded mid-lightweight Thermaflex neoprene. Shaped fit to body and legs provides additional comfort and enhanced fit. The fabrics have been upgraded with environmental impact playing an important part in the development as well as performance.

#### Features:

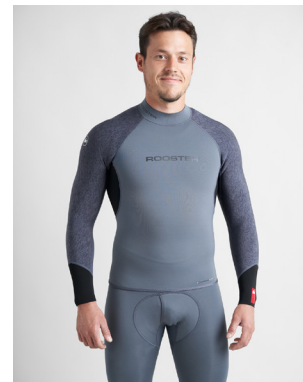

- Prevent legs and body for optimum fit in watersport applications
- Clean entry system with no Velcro
- Relief flap at crotch
- ProHike Pad Compatible
- Silicon print on inside of ankles
- Reinforced seams at lower legs for capability to cut legs to a shorter length
- Flatlock Stitching
- DWR (Durable Water Repellent) coating on front of legs

#### Materials:

- Recycled Polyester
- Ventiprene®
- Limestone 1.5mm Neoprene

## THERMAFLEX® 1.5MM TOP

**Colour:** Grey/Black/Melange

**Size Range:** Junior S, Junior L, XS, S, M, L, XL, 2XL

#### Features:

- Breathable underarm panels with anti-bacterial treatment
- Precurved arms
- Reinforced stitch at upper arm for capability to cut sleeves shorter
- Wicking lining
- Flatlock Stitching
- Raw edge neck and sleeve cuffs to minimise bulk and aid in comfort
- DWR (Durable Water Repellent) coating on arms

#### Materials:

- Recycled Polyester
- Ventiprene®
- Limestone 1.5mm Neoprene

## THERMAFLEX 1.5MM LEGS

**Colour:** Grey

**Size Range:** Junior, XS, S, M, L, XL, 2XL

1.5mm Thermaflex neoprene leggings with Duratex at seat part and knee/shin panel. There is capability to add ProHike pads into the seat part through a Hook & loop attachment at the inside surface. The fit has been developed for performance through a high curved waist profile with strong elastic tab adjustment pulling around the sides.

### Features:

- Duratex seat part with internal ProHike pad attachment capability
- Duratex knee/shin panels with additional padding
- Secure fit waistband with strong elastic tab adjustment
- Curved waist profile for a better fit
- Additional panel at back (above seat panel) for manoeuvrability
- Prebent knees
- Raw edge ankle cuffs

### Materials:

- Ventiprene®
- Limestone 1.5mm Neoprene
- Duratex

## WOMENS THERMAFLEX® 1.5MM TOP

**Colour:** Grey/Black/Azure

**Size Range:** Junior, 8, 10, 12, 14, 16

1.5mm Thermaflex® top, specifically designed for women, combining a flattering as well as comfortable and manoeuvrable fit with our all over print down the arms and across the chest. The ultimate Neoprene top for all seasons. Made from Thermaflex 1.5mm SuperStretch Neoprene for unrestricted movement and superior knock protection.

### Features:

- Seams and panel layout adds shape to the female fit
- Unrestrictive fit and flex
- Long length for better fit
- Provides an additional protective layer from knocks and scrapes

### Materials:

- Limestone 1.5mm Neoprene
- Duratex

## WOMENS THERMAFLEX® 1.5MM LONGJOHN

**Colour:** Grey/Black/Azure

**Size Range:** Junior, 8, 10, 12, 14, 16

1.5mm Thermaflex® neoprene longjohn with a specific womens fit. Azure print on the lower leg back panels. The longjohn has a front zip and racer shaped back to add more comfort and aid in manoeuvrability. Silicon print on the inside to grip to the ankles, with the ability to be cut to length for the shorter people. Duratex II™ at knees/shin and seat part with ability to add ProHike™ pads.

### Features:

- Seams and panel layout adds shape to the female fit
- All over print on the lower back legs
- Black panels at sides create a slimming illusion
- Racer back for mobility and comfort
- Silicone print on inside of ankles
- Reinforced seams at lower legs for ability to cut the leg length shorter
- Unrestrictive fit and flex
- Front chest zip
- Duratex wear resistant Seat & knees
- ProHike™ Pad Compatible

### Materials:

- Limestone 1.5mm Neoprene
- Duratex

## CLASSIC THERMAFLEX® 1.5MM LONGJOHN

**Colour:** Grey/Black

**Size Range:** Junior S, Junior L, XS, S, M, L, XL, 2XL

Our classic Thermaflex longjohn is our cheaper level option in this range. Still offering great features, with a velcro opening shoulder entry, Duratex II knee and seat panels with Pro-Hike pad capability. Bold branding is on the right leg with black contrast side panels are part of our classic design.

### Features:

- Comfortable & unrestrictive
- Asymmetric Velcro shoulder entry closure
- Integral/concealed relief flap with Velcro securement
- Duratex II™ wear resistant knee and seat panels
- ProHike™ Pad Compatible

### Materials:

- Thermaflex™ 1.5mm Super Stretch Neoprene
- Thermaflex™ soft lining
- Duratex II™

## CLASSIC THERMAFLEX® 1.5MM TOP

**Colour:** Grey/Black

**Size Range:** Junior S, Junior L, XS, S, M, L, XL, 2XL

Our classic Thermaflex top is our cheaper level option in this range. Still offering great comfort and manoeuvrability with the soft stretchy neoprene. Bold branding is on the left arm with black contrast side panels are part of our classic design.

### Features:

- Comfortable & unrestrictive
- Double layer neoprene collar

### Materials:

- Thermaflex® 1.5mm Super Stretch Neoprene
- Thermaflex® soft lining

## THERMAFLEX® 2.5MM SOCKS

**Colour:** Black

**Size Range:** Junior, 2XS/XS, S/M, ML/L, XL/2XL

Rooster Thermaflex® 2.5mm Neoprene Wet Socks are our softest and stretchiest socks meaning they can span several shoe sizes. This makes it easier for you to find the correct size for your foot and a closer fit means warmer feet! The size chart shows the suggested size for each of these socks, allowing you to pick the one you require. Laundry instructions - we recommend hand washing in warm soapy water and allowing to air dry.

### Features:

- Super stretchy comfortable lining
- Snug fit next to skin
- Flatlock stitching

### Materials:

- Thermaflex® 1.5mm Super Stretch Neoprene
- Thermaflex® soft lining

# SUPERTHERM®

## WARM 4MM WETSUIT COMFORT & MOVEMENT

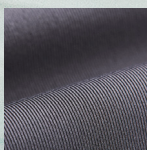

Our warmest collection using mainly 4mm superstretch neoprene in combination with some thinner neoprene on specific panels where more stretch or movement is required. We combine the superstretch neoprene with several different linings and outer surface fabrics to give the best performance in our products. Our Supertherm® products all use Glued Blind Stitching (GBS) to increase warmth and minimise water coming through the seams.

We have started to move over to more eco friendly premium materials and linings, with enhanced fit, features, and comfort.

## SUPERTHERM® 5/4/3MM CHEST-ZIP STEAMER

SUPERTHERM®

Colour: Black/Melange

Size Range: Junior, XS, S, M, L, XL, 2XL, 3XL

SUPERTHERM®

Built for superior warmth, unrestricted movement and total comfort when in the water. Featuring our quick-dry thermal lining on the chest and back panel with super low density neoprene used throughout to give maximum movement with ultimate insulation. The entire suit is glued and blind stitched to prevent cold water flushing with the addition of flexible neoprene tape on high wear seams to improve durability.

### Features:

- 5/4/3mm 4 way Super Stretch Neoprene
- GBS (glued, blind stitched) and seam sealed to prevent cold water flushing
- Inner plush fleece with quickdry thermal lining on chest and back panel
- Unrestrictive fit and flex with pre bent joints.
- Front-zip chest entry
- Durable wear resistant knees and seat

### Materials:

- Supertherm® Superstretch Neoprene
- Supertherm® soft quick dry lining
- Durable seat and knee panels

## SUPERTHERM® 4MM LONGJOHN

Colour: Black/Melange

Size Range: Junior S, Junior L, XS, S, M, L, XL, 2XL

The longjohn has a quick dry super soft front panel designed to work in conjunction with the Supertherm® Top, which has a quick dry panel at the back providing superior warmth and comfort around the entire core when worn together. Your best friend in the coldest conditions (below zero) but able to take you up to around 15 degrees, due to its breathability and fast drying properties.

### Features:

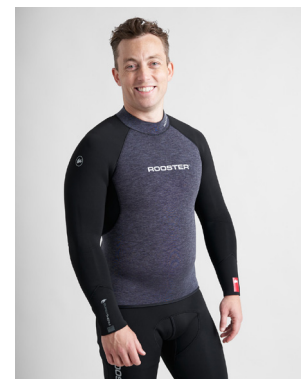

- Water based glue (no harmful chemicals released in manufacture)
- Prebent legs and body for optimum fit in watersport applications
- Clean entry system with no Velcro
- Quick dry thermal lining with a super wicking heat boost panel inside chest
- Relief flap at crotch
- ProHike Pad Compatible
- Reinforced seams at lower legs for capability to cut legs to a shorter length
- Drainage holes at back of lower legs for quick flushing
- GBS (Glued & Blind Stitched)
- DWR (Durable Water Repellent) coating on front of legs

### Materials:

- Recycled Polyester
- Ventiprene®
- Limestone 4mm Neoprene

SUPERTHERM®

## SUPERTHERM® 4MM TOP

Colour: Black/Melange

Size Range: Junior S, Junior L, XS, S, M, L, XL, 2XL

Quick dry super soft back panel designed to work in conjunction with the Supertherm® Longjohn, which has a quick dry panel at the front in order to provide superior warmth and comfort around the entire core when worn together. Your best friend in the coldest conditions (below zero) but able to take you up to around 15 degrees, due to its breathability and fast drying properties.

### Features:

- Water based glue (no harmful chemicals released in manufacture)
- Breathable underarm panels with antibacterial treatment
- Quick dry thermal lining with a super wicking heat boost panel at inside back
- GBS (Glued & Blind Stitched)
- Unrestrictive fit - Precurved arms
- Raw edge neck and sleeve cuffs to minimise bulk and aid in comfort
- DWR (Durable Water Repellent) coating on arms

### Materials:

- Recycled Polyester
- Ventiprene®
- Limestone 4mm Neoprene

SUPERTHERM®

WOMENS SUPERTHERM® 4MM LONGJOHN

**Colour:** Grey/Black

**Size Range:** Junior L, 8, 10, 12, 14, 16

4mm SuperTherm® Longjohn, specifically designed for women, with fast drying soft lining for extreme warmth, contoured panel layout and contrasting panel thicknesses, Front zip, racer back and silicone on the ankle lining for lower leg grip. Duratex™ reinforcements for unrivalled durability on knees and seat.

**Features:**

- Seams and panel layout adds shape to the female fit (waist, chest, arms)
- 4mm / 4-way SuperStretch Neoprene: glued and blind stitched
- Warm, soft, quickdrying
- Silicone printed inside of the ankles
- Reinforced seams at lower legs for ability to cut the leg length shorter
- Unrestrictive fit and flex
- Front chest zip
- Anti-flush silicone ankle rings
- Duratex™ wear resistant knees and seat panel
- ProHike Pad Compatible

**Materials:**

- Limestone 4mm Neoprene

WOMENS SUPERTHERM® 4MM TOP

**Colour:** Grey/Black

**Size Range:** Junior L, 8, 10, 12, 14, 16

4mm Rooster® SuperTherm® neoprene top, specifically fitted to suit women, with contoured panel layout, super soft quick dry thermal lining and contrasting panel thickness blending extreme warmth, comfort, performance and style. The ultimate Neoprene top for all seasons. Made from SupersTherm® 4mm Neoprene for unrestricted movement and superior knock protection.

**Features:**

- Warm, soft, quick drying
- Seams and panel layout adds shape to the female shape (waist, chest, arms)
- Provides an additional protective layer from knocks and scrapes
- Longer body for better fit

**Materials:**

- Limestone 4mm Neoprene

SUPERTHERM® SOCKS

**Colour:** Black

**Size Range:** Junior, 2XS/XS, S/M, ML/L, XL/2XL

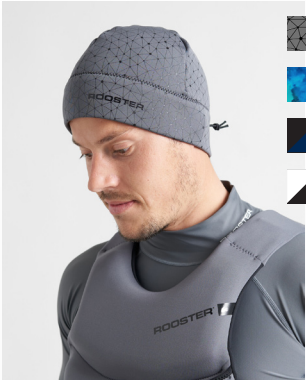

Designed to keep your feet SUPER warm! The superstretch neoprene outer allows these socks to span several shoe sizes making it easier for you to find the correct size - a closer fit means warmer feet! Inside the sock there is a super soft, grey marle, quick-dry lining which not only improves the thermal qualities of the sock, it also feels very soft and comfortable next to your skin. The sock is glued and blind-stitched to prevent cold water flushing, with a comfortable seam layout designed to maximise comfort when wearing.

**Features:**

- 4mm superstretch neoprene
- Glued & blind stitched

SUPERTHERM® BEANIE

**Colour:** Constellation Grey, Azure, Blue/Black, White/Black

**Size Range:** S/M, L/XL

**Features:**

- 4/2mm 4-way superstretch neoprene
- Adjustable elastic drawcord around headband
- Plush, quick-dry lining
- Reinforced stitching at back for optional Ponytail hole
- Elastic loop attachment for tying to other items of clothing

**Materials:**

- Limestone Neoprene
- SupersTherm lining

# THE ESSENTIALS RANGE

SPEND LESS AND GET ON THE WATER IN COMFORT

Our latest range of Essentials kit brings exceptionally comfortable and hard working garments at an economical price, perfect for multi water sport crossovers. Encouraging beginners and schools to enjoy the water in quality kit. These products include:

## ESSENTIALS 2MM FULL WETSUIT

**Colour:** Black/Melange

**Size Range:** Junior S, Junior M, Junior L, S, M, L, XL 2XL

2mm back-zip full length wetsuit constructed from soft stretch neoprene – the perfect all-rounder. Durable construction with reinforced zipper base and Duratex used on the seat and knee panels. Simplistic design, suitable for a range of watersports.

**Features:**

- Back zip entry
- Full length
- Duratex wear resistant knee and seat panels
- Adjustable ankle entry on Junior sizes for ease of fitting
- Reinforced zipper base
- Zipper back protector
- Velcro neck tab closure
- Ideal for a range of watersports

**Materials:**

- 2mm Stretch neoprene
- Duratex

## ESSENTIALS 2MM SHORTY WETSUIT

**Colour:** Black/Melange

**Size Range:** Junior XS, Junior S, Junior M, Junior L, S, M, L, XL 2XL

2mm back-zip shorty wetsuit constructed from soft stretch neoprene – the perfect all-rounder. Durable construction with reinforced zipper base and Duratex used on the seat and knee panels. Simplistic design, suitable for a range of watersports.

**Features:**

- Back zip entry
- Knee length legs and short arms
- Duratex wear resistant seat panels
- Reinforced zipper base
- Zipper back protector
- Velcro neck tab closure
- Ideal for a range of watersport

**Materials:**

- 2mm Stretch neoprene
- Duratex

## ESSENTIALS FRONT ZIP BUOYANCY AID

**Colour:** Black/Blue

**Size Range:** Junior, Small/Medium, Large/X-Large

Compact multi-purpose buoyancy aid with short fit for ease of movement, suitable for all round watersports use. Both the shoulder and waist straps are highly adjustable to ensure that there is plenty of room for growth, providing a good fit for different body shapes. There is a hidden panel on the back sealed with Velcro allowing this product to be customisable.

**Features:**

- Designed with a high cut to allow unrestricted movement from the waist
- Adjustable waist and shoulder straps provide room for growth and the adaptability to ensure a close, safe fit for a wide variety of body shapes
- Durable fabric for greater longevity and wear resistance
- Pocket at back to allow for customised printing for teams etc.
- Leg straps on size Junior size
- CE ISO 12402-5 Certified and Approved

## ESSENTIALS NEOPRENE SHORTS

**Colour:** Black

**Size Range:** Junior S, Junior M, Junior L, XS, S, M, L, XL 2XL

2mm neoprene shorts constructed from soft stretch limestone neoprene. Durable construction with drawstring waistband and zigzag stitching at the hem of the leg. Contoured fit with curved waistband that is higher at the back and lower at the front for a more secure fit. Simplistic design, suitable for a range of watersports – perfect shorts for all round use.

**Features:**

- Length just above knee
- Curved waist profile for a better fit
- Drawstring waist
- Ideal for a range of watersport

**Materials:**

- 2mm Stretch neoprene

# DINGHY HIKING KIT

## CHOOSE YOUR KIT TO YOUR STYLE

Have the security of fixed Hike Pads with Rooster Classic Hikers or Pro Hikers and the flexibility of adjustable Pro Hike Pads. We've made sure that most of our neoprene longjohns, legs and shorts are pro hike pad compatible so you can keep the hike pads that perfectly mould to you on the go in whatever weather suit you're in.

WATCH THE VIDEO ABOUT OUR  
HIKING LEG OPTIONS

### PRO HIKERS 4/3MM (FIXED BATTENS)

**Colour:** Black

**Size Range:** 1(2XS) 2(XS) 3(S) 4 (M) 5(L) 6(XL) 7 (2XL)

Full length 4/3mm hiking pant with fixed battens in the back of the upper leg, which allow for a good connection with the boat. The fixed hiking battens feature a 500D PVC outer layer for extra grip and durability with Duratex™ at the seat part and knees/shin for extra protection and resilience required for top level performance. The knees/shin also feature additional padding for added protection against knocks around the boat. The pre-bend in the knee/leg supports hiking positions, and there is a soft elastic binding at the ankle to fit comfortably into the hiking boot.

#### Features:

- Adjustable shoulder straps
- Scooped waist and racer back design
- Material differentiation throughout to aid in hiking performance
- High stretch elastic binding at waist
- Raw edge smooth finish at ankles for comfort with boots
- Fixed Glass-fibre battens with 500D PVC cover at back of legs
- Super stretch behind knees for comfort when sailing downwind
- Duratex™ wear resistant knees with additional 5mm padding
- Duratex™ seat panel

### 3/4 CLASSIC HIKERS 4/3MM

**Colour:** Black/Red stripe

**Size Range:** 1(2XS) 2(XS) 3(S) 4 (M) 5(L) 6(XL)

Our Classic Hiking shorts are an iconic part of the Rooster range, being one of the first products brought out. We have developed them overtime with improved fabrics and technology to keep them at the top of their game! They have been designed with 10.5" batten pads at the back of the upper leg, which allow for a good connection with the boat. The battens are made in 3 parts enabling them to shape around the leg for maximum comfort and hiking longevity. Extra padding at the knee pads provides additional comfort whilst a thinner superstretch neoprene is used behind the knee to ensure a comfortable fit on the majority of leg sizes, and when in bent position.

#### Features:

- Adjustable shoulder straps (with ladder buckle)
- Low cut front panel
- Racer back design for secure fit at shoulders
- Material differentiation throughout to aid in hiking performance
- Soft elastic binding at waist and leg ends
- Fixed 10.5" battens
- 3D knee panel with superstretch neoprene behind knees
- Duratex™ seat and knee/shin panels

### PRO HIKE PADS

**Colour:** Black/Grey

**Size Range:** 185mm, 200mm, 220mm, 245mm, 265mm, 270mm

Pre-curved hiking pads constructed with strong battens sandwiched between preformed EVA foam, all of which encased in limestone neoprene for user comfort. We have used Limestone based neoprene, not only because it is better for the environment than traditional petroleum based neoprene, but also because it can cause less irritation to the skin due to the larger amount of air bubbles inside the rubber, and reduced toxic resources during production.

Rooster Pro Hike Pads are suitable for use with our Longjohns, Race Armour Lite Shorts and Pro Rash Legs.

### RACE ARMOUR LITE SHORTS

**Colour:** Black

**Size Range:** Junior L, XS, S, M, L, XL, 2XL

Multi-function heavy weight 410gsm spandex shorts with dual-layer contoured neoprene padding Duratex seat panel. There is capability to add ProHike pads into the seat part through a Hook & loop attachment at the inside surface. The fit has been developed for performance through a high curved waist profile with strong elastic tab adjustment pulling around the sides – perfect to get the perfect secure fit on a range of body shapes.

#### Features:

- Duratex seat part with internal ProHike pad attachment capability
- Secure fit waistband with strong elastic tab adjustment
- Curved waist profile for a better fit
- Additional panel at back (above seat panel) for manoeuvrability

#### Materials:

- 410gsm Nylon Spandex
- Duratex
- Limestone based Neoprene

### WEAR PROTECTION SHORTS

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL

Made with the heaviest denier polyester/ elastane mix to give you the reassurance that your wetsuit or hikers will be free from snags and wear. Designed to give the sailor grip whilst hiking, but ease of movement around the boat.

NOTE: Wear protection shorts are NOT Rooster hike pad compatible. (i.e pads cannot be fitted to the inside of these shorts)

#### Features:

- Heavy denier polyester/elastane mix
- Ideal layer for protecting hikers and wetsuits
- Provides the perfect amount of grip for stable hiking with the ability to move around the boat freely
- Drawcord waistband

#### Materials:

- Heavy Duty Nylon Spandex 420gsm
- Silicon backed elastic binding

# TRAPEZING

## TRAPEZE HARNESS WITH NAPPY CROTCH

**Colour:** Black

**Size Range:** XS/S, M/L, XL/2XL

The Rooster® Trapeze Harness is fully compliant with the new weight rules and has positive buoyancy as per requirements in the 2021-2024 new World sailing rules. The curved and pre-shaped body can be adjusted at 3 points on each side to allow adjustment down the upper back, across the middle, and up from the seat panel, to tailor the fit to different shapes. This harness is compatible with a wide bar to support the hips and lower back, the bar can be changed to preference through the harness bar slot at the front.

### Features:

- Soft Duratex neoprene nappy style crotch with reinforcement at edges
- 3 point lace adjustment (each side) - upper back, waist, and seat
- Inside pocket to tuck away laces
- Internal waistband closure for a more secure fit
- Wide spreader bar slot that allows for your preferred bar
- Adjustable shoulders with webbing and buckle closure
- Internal foam creating shock absorption
- A section on the back for optional back support

### Materials:

- Heavy-duty Ripstop Nylon
- Duratex seat and crotch
- NBR Rubber

## HARNESS BACK PAD

**Colour:** Grey

**Size Range:** Small (272mm), Large (340mm)

A dual density NBR rubber pad shaped to support the back posture when used in the harness. The pad has a soft layer, worn next to the body, and a harder dense layer which attaches to the harness with additional support from glass fiber battens sandwiched between the 2 layers, making it more comfortable. The NBR Rubber moulds well to your back and has a small amount of shock absorption without absorbing a lot of water.

### Features:

- Dual density back pad
- Glass fiber batten support
- Hooked surface at back to attach to the inside of the harness
- Available in 2 sizes

### Materials:

- NBR Rubber
- Glass fiber battens

## PRO COMPRESSION BIB

**Colour:** Black/Grey

**Size Range:** S, M, L, XL

The Bib is made from heavy duty wear resistant Spandex with a long length secure fit. Designed to improve performance in high-performance trapeze/ dinghy environments through solving several problems; safety, compression/ anti catch and trapeze compatibility. Two key features include a safety accessory pocket with tether point for the knife and a trapeze hook compatibility panel. Red stitching and bold white logos at parts aid safety and visibility.

### Features:

- Close, snag free, compressive fit
- Knife pocket at front with easy to open construction
- Neoprene reinforced harness hook panel at centre front
- Strong silicon backed elastic binding at hem for added structure and to prevent bib riding up
- Strong flatlock stitching construction

### Materials:

- Heavy Duty Nylon Spandex 420gsm
- Silicon backed elastic binding

## SAFETY KNIFE

**Colour:** Black

**Size Range:** One Size 175mm X 45mm X 13mm

Featuring a moulded body with a replaceable stainless steel blade.

### Features:

- The opposed slopes at the back of the blade reduces friction resistance which enables a smooth and more effective cut
- 175 X 45 X 13mm
- Fast easy blade change
- Ergonomic design
- Lightweight
- Maximum rope diameter for cutting - 10mm

### Materials:

- 20% Glass filled nylon plastic
- Brass Screw

# AQUAFLEECE®

## THE ORIGINAL

Our development of the water sports Aquafleece® material revolutionised the standard spray top. The fabric has a Polyurethane coating on the outside for water resistance, durability and flexibility combined with a bonded fleece inner layer to keep you snug and warm a combination that works well when wet or dry.

### ACTIVE AQUAFLEECE® TOP

**Colour:** Signal Blue, Black, Flo Yellow, Teal, Orange

**Size Range:** XS, S, M, L, XL, 2XL, 3XL

This top has a large front zipper for ventilation. The panels at the upper body and shoulders has been designed to allow extra space for a large range of movement. Aquafleece® utilises a water resistant, durable & flexible polyurethane coating on the outside, with a fleece inner layer - a combination that works well when wet or dry. Un-taped seams so that the top can be more breathable, but the overlock seams still protects you from rain and spray.

#### Features:

- Water resistant construction
- Soft light fleece lining for warmth and comfort in all climates
- Seams are not taped so perfect crossover top for a range of temperatures
- Large zip opening at front for instant venting
- Elasticated adjustable neck bungee - adjusts from back
- Elastic adjustment around hem
- Adjustable Velcro cuffs
- Handy pocket inside chest
- Seams and panel layout fit well for unisex wear

#### Materials:

- Rooster PU laminated and bonded light fleece
- Composition: 88% Polyester, 12% PU

ROOSTER  
AQUAFLEECE

### AQUAFLEECE® HOODIE

**Colour:** Grey/Black, Blue/Black, Teal/Black, Khaki/Black, Pink/Black

**Size Range:** Junior Small, Junior Large, XS/S, M, L, XL/2XL, 3XL/4XL

Oversized, warm, slip on, water resistant. Utilising the qualities of our Aquafleece fabric, it combines a soft, durable and flexible polyurethane outer coating with a light fleece inner layer to keep you snug and warm. The stretchy waterproof fabric moves with you and the soft fleece lining feels comfortable next to your skin.

#### Features:

- Waterproof fabric
- Soft light fleece lining for warmth and comfort in all climates
- Large hood with drawcord adjustment around face
- Large neck opening for ease of donning
- Drainage holes at pockets
- Adjustable hem with elasticated drawcord
- Adjustable Velcro cuffs
- Contrast Raglan sleeve styling

#### Materials:

- Rooster PU laminated and bonded light fleece
- Composition: 88% Polyester, 12% PU

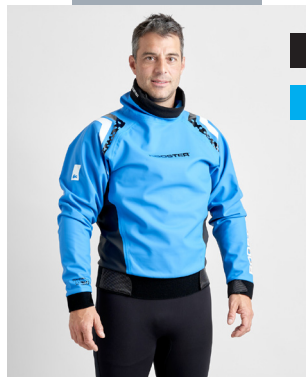

ROOSTER  
AQUAFLEECE

**"COMFORTABLE AND WINDPROOF.**  
Comfortable, insulated sweatshirt / jacket for the autumn / winter / spring period. Hood with a high collar provides protection against wind and rain. Pockets fastened with a waterproof zipper are the perfect solution in this sweatshirt. After a dozen or so uses, I can honestly recommend it."

- Michal S -

## PRO AQUAFLEECE® TOP

**Colour:** Black, Blue

**Size Range:** JS, JM, JL, XS, S, M, L, XL, 2XL, 3XL, 4XL, 5XL

Utilising our stretchy waterproof Aquafleece® fabric, we use a heavier fleece lining on our Pro-Aquafleece® top and tape the seams to provide superior warmth and wind/water protection, whilst allowing for free movement. The taped seams protect from any water ingress and when combined with neoprene wrist and waist fastenings, a wide fleecy neck and elasticated drawstring neck closure, it offers the ultimate semi-dry top for protection in the harshest of climates.

### Features:

- Warm fleece lining for even more warmth and comfort
- Taped seams, for added waterproof protection in the body
- Wide neck opening with elasticated drawstring neck closure
- Soft fleece at neck edge for comfort against your face
- Adjustable neoprene waist and wrist seals
- Semi dry construction

### Materials:

- Rooster heavyweight PU laminated and bonded fleece
- Composition: 88% Polyester, 12% PU

## PRO LITE AQUAFLEECE® TOP

**Colour:** Unisex: Grey, Blue, Orange, Navy Womens: Teal, Pink

**Size Range:** JS, JM, JL, XS, S, M, L, XL, 2XL, 3XL, 8,10,12,14,16

The Rooster Pro Lite Aquafleece top combines a soft, durable and flexible polyurethane outer coating with a light fleece inner layer to keep you snug and warm. The stretchy waterproof fabric moves with you and the soft fleece lining feels super-comfortable next to your skin. This, combined with neoprene wrist and waist fastenings, a high elasticated drawstring neck closure. Available in Unisex, Womens, Junior and Junior girls fit.

### Features:

- Water resistant construction
- Soft light fleece lining for warmth and comfort in all climates
- Seams are not taped so perfect crossover top for a range of temperatures
- Elasticated adjustable neck bungee
- Soft fleece at neck edge for comfort against your face
- Adjustable neoprene waist and wrist seals
- Slim fitting

### Materials:

- Rooster PU laminated and bonded light fleece
- Composition: 88% Polyester, 12% PU

## CLASSIC AQUAFLEECE® TOP

**Colour:** Unisex: Grey, Blue. Womens: Teal, Pink

**Size Range:** JS, JM, JL, XS, S, M, L, XL, 2XL, 3XL, 8,10,12,14,16

Polyurethane coating on the outside for water resistance, durability and flexibility combined with a fleece inner layer to keep you snug and warm. Available in Unisex, Womens, Junior and Junior girls fit.

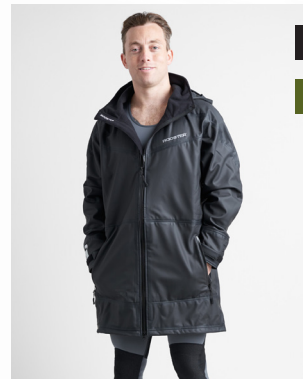

### Features:

- Water resistant construction
- Soft light fleece lining for warmth and comfort
- Elasticated adjustable neck bungee
- Elasticated wrists
- Soft fleece at neck edge for comfort against your face
- Tight fitting at hem/hips to maintain position on body

### Materials:

- Rooster PU laminated and bonded light fleece
- Composition: 88% Polyester, 12% PU

## PRO AQUAFLEECE® RIGGING COAT

**Colour:** Black, Khaki Green

**Size Range:** Junior, XS/S, M/L, XL/2XL

Incorporating all the great features of the Rooster Pro Aquafleece® top, with a deliberately long and roomy, almost poncho style fit. The Rooster Pro Aquafleece® Rigging Coat with its fully taped seams, warm fleece lining & water resistant coating is great to simply throw on over your sailing kit for rigging & de-rigging in the rain. It's also perfect for layering up on cold winter days when walking the dog, or standing on the touchline!

The wrists feature a double cuff construction with a soft, elasticated lycra binding on the inside and Velcro adjusters on the outside. There's a headphone access point on the inner pocket, two deep fleece-lined outer pockets with heavy duty waterproof YKK zips to keep things warm and dry. The high standing collar and colour-matched, tailored, peaked hood keeps the wind and rain out.

### Materials:

- Rooster heavyweight PU laminated and bonded fleece
- Composition: 88% Polyester, 12% PU

## AQUAFLEECE® ROBE

**Colour:** Black - Blue Lining, Black - Red Lining, Khaki Green - Black Lining.

**Size Range:** Junior, Adult

**The first watersports robe with a removable lining\*** – for easy cleaning/drying. Oversized, warm and versatile jacket with removable quick drying teddy fleece lining – the perfect jacket for warming up after a sports activity. Waterproof, windproof and durable due to Rooster's iconic Aquafleece® fabric outer shell. The soft and fluffy teddy lining at the inside of the robe can be fully removed from the jacket, giving you the ability to wash it and keep it fresh, and bonus it is made from recycled polyester!

### Features:

- Waterproof fabric with taped seams
- Soft bonded fleece to the inside surface of the Aquafleece® outer shell
- Fully removable lining
- Soft fluffy teddy quick dry lining
- Fleece lined hand pockets
- Adjustable Velcro cuffs

### Materials:

- Rooster PU laminated and bonded fleece (88% Polyester, 12% PU)
- Recycled Polyester Lining

\*That we're aware of - we've looked very hard

*"Where I live (near seattle) its wet and windy. This keeps water splashes off, dries fast if you end up in the drink, and keeps warm even when wet. It stays on my head, keeps hair out of the way."*

- Nicholas T -

## AQUAFLEECE® NECK GAITER

- Colour:** Black, Blue, Teal, Flo-Yellow, Khaki Green, Orange, Navy, Pink
- Size Range:** One Size
- Features:**
  - Aquafleece® Neck Gaiter uses a combination of Aquafleece® and PolyPro™ with an adjustable toggle to keep it held in position
  - 3 products: neck gaiter, beanie, balaclava
  - Aquafleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
  - Adjustable drawstring
  - The perfect accessory for any outdoor activity including sailing, cycling, motorcycling, walking, skiing and snowboarding.

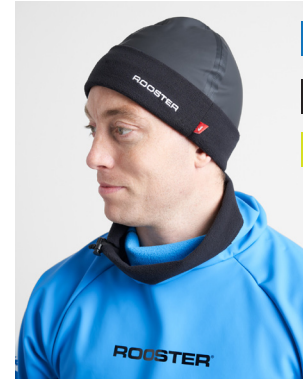

## AQUAFLEECE® BALACLAVA

- Colour:** Black, Black/Flo Yellow
- Size Range:** One Size
- Features:**
  - Inspired by water, the Aquafleece® Neck Gaiter uses a combination of Aquafleece® and PolyPro™ to make this a must have watersports accessory, providing protection from the elements without compromising comfort.
  - Minimalistic design well suited to fit underneath any type of helmet
  - Aquafleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
  - The perfect accessory for any outdoor activity including sailing, cycling, motorcycling, walking, skiing and snowboarding.

## PRO AQUAFLEECE® BEANIE

- Colour:** Blue, Black, Black/Flo Yellow
- Size Range:** S, M, L, XL
- Features:**
  - Combining the thicker Pro Aquafleece® fabric together with taped seams that helps to lock in the heat to your head.
  - Wind chill protection is provided in abundance by the Pro Aquafleece® and the taped seams add security and prevent flushing through the seams.)
  - Upgraded fleece lining from the standard Aquafleece
  - Taped seams to minimise water ingress
  - Secure internal loop for attaching the Rooster Cap Leash

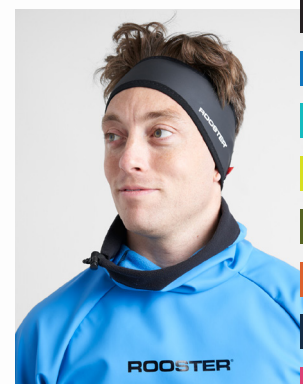

## AQUAFLEECE® BEANIE

- Colour:** Grey, Teal, Khaki Green, Orange, Navy, Pink
- Size Range:** S, M, L, XL
- Features:**
  - Made from the same material as our famous Aquafleece tops - Polyurethane coating on the outside combined with a fleece inner layer, a combination that virtually eliminates windchill and hence is very warm.
  - Aquafleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
  - Secure loop for attaching Rooster Cap Leash

## AQUAFLEECE® HEADBAND

- Colour:** Black, Blue, Teal, Flo Yellow, Khaki Green, Orange, Navy, Pink
- Size Range:** One Size
- Features:**
  - Featuring Aquafleece® construction to provide wind protection to the front and sides of the head, protecting the ears and reducing heat loss in from wind chill. 'Fit' is taken care of by the integrated PolyPro™ stretch panel, worn at the rear to allow different size heads and hair styles to be accommodated, whether you wear your hair up or down.
  - Aquafleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
  - PolyPro™ stretch panel

## PASSAGE 3 LAYER JACKET

*"Comfortable and lets no water in. Really insulates in cold weather. And I love how I look in it! :)"*  
- Xavi T -

**Colour:** Black/Grey/Flo-Yellow hood

**Size Range:** Junior L, XS, S, M, L, XL, 2XL

**PASSAGE 3L**

Constructed from 3-layer material with durable fully taped seams for maximum water and spray protection. This jacket is tailored to include cleverly positioned pockets, reflective stow away hood, fleece lined hand warmer pockets, reflective prints and adjustable cuffs/hem. A comfortable fit that comes in cool tonal grey/black with accents of Rooster red styling throughout.

### Features:

- Large front pockets with an easy access opening and a plastic key loop inside
- Fleece lined hand pockets
- Chest pockets with water repellent zippers.
- Hidden pocket under main opening flap to stow items safely
- Reflective stow away hood structured peak construction and back adjustment.
- Reflective 3M Scotchlite™ prints at top arms and front.
- Double zipper cover at main zipper with water drainage channel.
- Adjustable cuffs with tight fitting inner adjustable cuffs in contrast yellow
- Hangloop at outside back of jacket for ease of hanging.
- Adjustable hem with elastic cord adjustment.
- Mid length fit with scooped back for added protection at butt.
- 3D profile fit around neck for improved comfort and water protection.

### Materials:

- 320D Nylon Taslon with a TPU membrane and 20D Polyester Tricot
- DWR finish
- WP: 12000mm
- MVP: 12000g/m3
- Cordura® 1000D reinforcements with PU waterproof coating 1000mm
- 3M reflective printings

- WP: 12000mm
- MVP: 12000g/m3
- Cordura® 1000D reinforcements with PU waterproof coating 1000mm
- 3M reflective printings

## TECHNICAL SHORTS

**Colour:** Black/Grey

**Size Range:** Junior, XS, S, M, L, XL, 2XL, 3XL

Technical shorts constructed in quick-dry, UV protective, stretch fabric with a Cordura® reinforced seat panel - perfect for days on the water, keelboat sailing, nights in the workshop or rolled up and packed for your next adventure. Included in the design are pockets to slot our optional specifically designed RaceArmour deck pads, adding comfort for those tough hiking days on the rail.

### Features:

- Double popper closure
- Cordura® reinforced seat panels
- Adjustable Velcro closure at sides of waist
- Zipped hand pockets with mesh drainage
- Pockets inside for Race Armour deck pads
- UVF 30+
- Water repellent (DWR) coating

### Materials:

- Nylon Stretch with Nylon 66 Cordura®

TECH SHORTS SYSTEM

## RACE ARMOUR DECK PADS FOR TECHNICAL SHORTS

**Colour:** Grey

**Size Range:** One Size - self trimmed

Race Armour Deck Pad designed to fit specifically with Rooster Technical Shorts. The pad can be cut to size with the cut lines that are printed on the pad. They simply slot into the pockets on the inside seat panels of our Technical Shorts.

Protection has been achieved to follow in our 'Race Armour' range, with the use of NBR rubber - this has minimal water absorption so weight will not be added to the pads when wet, the properties of the rubber also mean that the pad will mould to your body slightly supporting and protecting your legs and also adds some shock absorption when needed.

### Features:

- Specifically shaped for the Rooster Technical Shorts
- Printed cut lines for ability to cut to size
- Shock and impact enhanced NBR foam
- Thin flexible yet durable

### Materials:

- NBR Rubber

# 2.5L LIGHTWEIGHT SPRAY & WIND PROTECTION

Great for use over hydration vest

## LIGHTWEIGHT SPRAY TOP - 2.5L

2.5 LAYER TECHNOLOGY

WATERPROOF|WINDPROOF|BREATHABLE

**Colour:** Grey

**Size Range:** Junior, XS, S, M, L, XL, 2XL, 3XL

Low bulk, lightweight performance spray top perfect for those wet windy moderate to hot days. This top has the benefit of a long asymmetric water repellent 1/2 chest zipper. The hem and cuffs are adjustable for a secure fit and extra protection from waves and rain, with an internal silicon band around the hem to securely grip to your base layer and stay in place.

### Features:

- Waterproof construction with taped seams
- Adjustable cuffs and hem with silicon binding at hem for a secure fit
- Breathable fabric
- Slim fit
- Low collar
- Asymmetric long water-resistant zipper at neck with gusset behind

### Materials:

- 100% Polyester (70gsm) shell
- PU printed film layer inner
- WP: 5000mm
- MVP: 5000g/m3

*"I gave this its first proper try during the Transatlantic Race and it was perfect for the warmer conditions especially when you are sailing fast and there is a lot of spray but you still want to stay cool. When the conditions picked up I just threw another waterproof layer over the top and it acted as a great mid layer as it's super light and flexible. I look forward to using it for the rest of the Caribbean season!"*

- Sam M -

## LIGHTWEIGHT SMOCK - 2.5L

2.5 LAYER TECHNOLOGY

WATERPROOF|WINDPROOF|BREATHABLE

**Colour:** Grey

**Size Range:** Junior, XS, S, M, L, XL, 2XL, 3XL

Low bulk, lightweight performance smock perfect for those wet windy moderate to hot days. This breathable and waterproof minimalistic top is constructed with no neoprene or adjustments and packs up small enough to easily stuff into your 10L drybag for easy storage.

### Features:

- Waterproof construction with taped seams
- Elasticated cuffs and hem
- Breathable fabric
- Slim fit
- Low collar with Polypro panel at front neck for comfort
- Simple overhead donning

### Materials:

- 100% Polyester (70gsm) shell
- PU printed film layer inner
- WP: 5000mm
- MVP: 5000g/m3

### "VERY LIGHTWEIGHT BUT EXCEPTIONALLY GOOD

*I am very pleased with this purchase which was bought with a view to racing in Lake Garda later this year which is generally a hot but breezy venue. I have completed two days racing with it this weekend and found it to be very lightweight and streamlined, providing the ideal balance of keeping the wind and water off whilst maintaining freedom of movement."*

# BUOYANCY AIDS

THE SEA IS AN OPEN INVITATION  
BUT IT HAS RULES - RESPECT THE DRESS  
CODE AND PROTECT YOURSELF

## 50N CE RACE ARMOUR BUOYANCY AID

**Colour:** Black, Azure, Constellation Grey, Blue Seal

**Size Range:** XS, S, M, L, XL

Low profile neoprene buoyancy aid, specifically developed to fit snugly in all the right places. This CE12402-5 certified buoyancy aid is complemented by minimalist styling to match the maximum kit combinations. It is longer and thinner to be less bulky when worn with minimal adjustment to limit bulk. The stretchy neoprene allows it to comfortably fit your body shape.

Aligns with both EN ISO 12402-5:2020 and the new UKCA Module B certification.

### Features:

- Overhead fitting
- Internal Dyneema webbings to add structure for safety
- Perforated neoprene side panels
- Durable water repellent coating on body panels
- 2 pockets in front panels
- Key cord bungee in front pockets
- Long close fit
- CE 12402-5 rated Buoyancy Aid
- UKCA Module B Certified

### Materials:

- Neoprene
- Perforated Neoprene at side panels
- PVC foam
- Internal Dyneema webbings

*"Everything about the life jacket I love, the pockets and the fit is perfect. It's a great life jacket and the best I've ever had."*  
- Alexis T -

## DIAMOND OVERHEAD BUOYANCY AID

**Colour:** Black, Blue

**Size Range:** Junior, S, M, L, XL

The comfortable, compact design of the Diamond Overhead Buoyancy Aid features a high cut waist to allow unrestricted movement and easy access for a trapeze, windsurf or kite hook. The adjustable shoulder and waist straps ensure a great fit for different body shapes, while the recessed, neoprene-covered buckles remove the risk of snagging on ropes and rigging. The strong, rip-stop fabric ensures longevity and provides greater wear resistance with reflective panels for visibility. The front pocket is large enough to keep a spare hat, safety knife, tape and snacks, with an integral hook and mesh pocket for your keys, shackles and other spares. Rated ISO CE12402-5.

### Features:

- Rated ISO CE12402-5.
- Designed with a high cut to allow unrestricted movement
- Adjustable waist and shoulder straps
- All buckles recessed into neoprene pockets
- Strong ripstop fabric for greater longevity and wear resistance
- Large, front pocket
- Reflective strips for visibility
- Legs straps on Junior size

## BUOYANCY AIDS

## SIDE ZIP BUOYANCY AID

**Colour:** Blue/Black

**Size Range:** Junior, XS, S, M, L, XL, 2XL, 3XL

This fully approved and certified CE12402-5 buoyancy aid has numerous features and fits adjustments. We have used a thinner foam throughout to reduce bulk, especially on the back panel (to limit catching your back on the boom). The front panel is segmented into 3 sections for improved fit and comfort around the natural 3D curvature of the body.

### Features:

- Concealed adjustable sides through webbing and buckle constructions
- Second adjustment strap and buckle at hem for further secure fit
- Curved fit at center front for ability to slot trapeze hook through
- Durable panel on front webbing to protect rubbing from trapeze hook
- Retro-reflective panels at shoulders
- Large asymmetric front zipped pocket with drainage
- 2x small elasticated side pockets
- Large hidden Velcro pocket at back for ability to do team branding

### Materials:

- Heavy Duty Ripstop Nylon

## ESSENTIALS FRONT ZIP BUOYANCY AID

**Colour:** Black/Blue

**Size Range:** Junior, Small/Medium, Large/X-Large

Compact multi-purpose buoyancy aid with short fit for ease of movement, suitable for all round watersports use. Both the shoulder and waist straps are highly adjustable to ensure that there is plenty of room for growth, providing a good fit for different body shapes. There is a hidden panel on the back sealed with Velcro allowing this product to be customisable.

### Features:

- Designed with a high cut to allow unrestricted movement from the waist and easy access to a trapeze hook
- Adjustable waist and shoulder straps provide room for growth and the adaptability to ensure a close, safe fit for a wide variety of body shapes
- Durable fabric for greater longevity and wear resistance
- Pocket at back to allow for customised printing for teams etc.
- Leg straps on size Junior size
- CE ISO 12402-5 Certified and Approved

# RACE ARMOUR AND IMPACT PROTECTION

## ROOSTER COMB HELMET

**Colour:** Black with red Rooster Comb stripe

**Size Range:** S/M, L/XL

Certified to CE EN 1385:2012, this performance helmet is the perfect companion to all watersports needs. Comfort, durability and reduced bulk have been at the core of the design of this helmet. Through the use of ABS/EVA construction enables excellent support and protection consistently overtime without deterioration.

The close fitting, highly ventilated shell ensures ultimate comfort with uncompromised vision, where removeable foam internal pads and an internal adjustment dial allow a secure fit across a range of head shapes. The helmet features removeable ear pieces with hearing perforations for added protection and a Fidlock® quick-snap chin strap for ease of donning, covered with a soft padding for added comfort.

Please note: Since the UK exit from the EU, there are further Helmet regulations that will come into play for the UK market from January 2023 onwards. Our helmet has already been through the testing, passed and is certified to align with both EN1385:2012 (regulation 2016/425) and the new UKCA Module B certification

**Features:**

- Dial adjustment at inner headband
- Rooster® M.I.S.R.A Foam lining for maximum shock absorption and comfort
- Includes additional internal pads to improve fit and comfort further
- Removeable ear pieces with perforation holes
- Fidlock® snap buckle
- Chin padding to support buckle
- Red flash styling on top for added visibility
- Weight: 385g (S/M – excluding ear pieces)
- 365g (L/XL – excluding ear pieces)

**Materials:**

- ABS Shell
- Rooster® M.I.S.R.A Foam inner lining

## RACE ARMOUR LITE SHORTS

**Colour:** Black

**Size Range:** Junior L, XS, S, M, L, XL, 2XL

Multi-function heavy weight 410gsm spandex shorts with dual-layer contoured neoprene padding Duratex seat panel. There is capability to add ProHike pads into the seat part through a Hook & loop attachment at the inside surface. The fit has been developed for performance through a high curved waist profile with strong elastic tab adjustment pulling around the sides – perfect to get the perfect secure fit on a range of body shapes.

**Features:**

- Duratex seat part with internal ProHike pad attachment capability
- Secure fit waistband with strong elastic tab adjustment
- Curved waist profile for a better fit
- Additional panel at back (above seat panel) for manoeuvrability

**Materials:**

- 410gsm Nylon Spandex
- Duratex
- Limestone based Neoprene

## RACE ARMOUR KNEE PADS

**Colour:** Black

**Size Range:** Junior, S, M, L

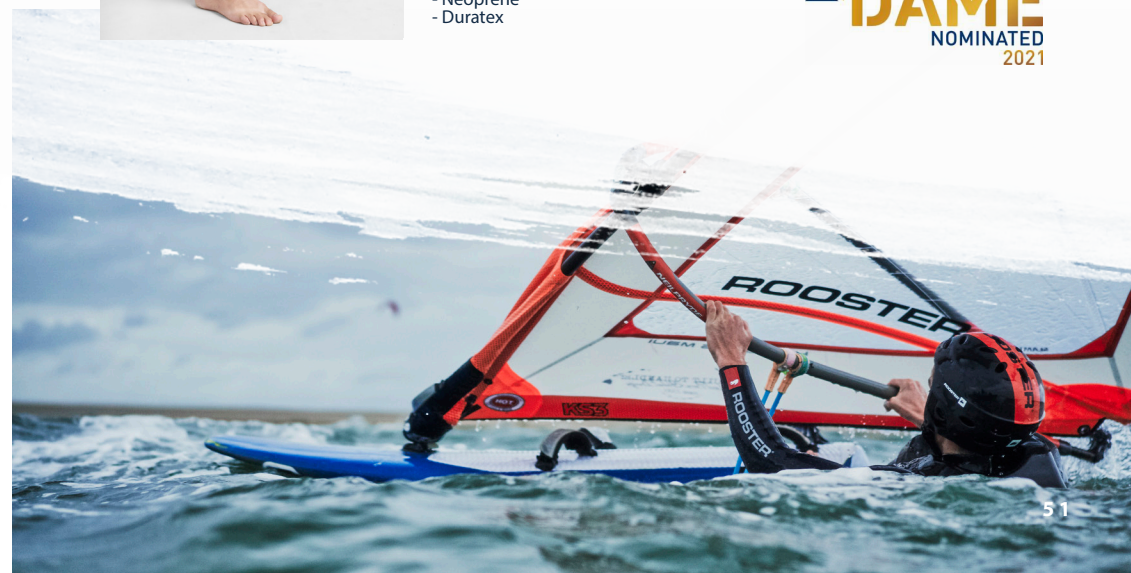

Long length knee pads that extend down to protect part of the shin. A streamlined fit with a silicon rubber elastic webbing strip at the top band and above the calf maintains the position of the knee pads, whilst an additional elastic strap is positioned just below the knee to further secure the pad in place.

**Features:**

- Integrated silicon webbing in top band and behind calf to secure position
- Breathable panel behind knee
- Contoured panel layout for improved movement
- Pull tabs inside top to aid in pulling on
- Elastic Velcro strap
- Rooster Race Armour pre-shaped foam inner pad

**Materials:**

- Heavy Duty Ripstop Nylon
- Neoprene
- Duratex

# PRODUCT DEVELOPMENT: HELMET

DELVING HEAD FIRST INTO SAFETY, HIGH IMPACT & FOILING

BY KATE MORRISON

Trends overtime have seen sailing pushing the limits that the wind and water can deliver, where speed and performance levels continue to rocket. This being said, the need for impact protection is continually growing as the sport reacts to its new safety demands. Developments in boat design are making high-performance sailing more accessible to all abilities. We are passionate about getting people on the water; we want to ensure that our product range is complete for the customer to come to one place to get comfortable performance gear at a fair price.

During the development process, we think about the lifetime of the product to not only minimise the environmental footprint but also as the user doesn't want the agro of having to keep buying new kit. We also look ahead at material trends and developments to ensure that when the release date comes around, we are up to date or even ahead of the curve.

Inspiration can come from anywhere. Sometimes it is the unplanned conversations with people that end up triggering the best inspiration for a new idea. Personally, I like to walk around, whether it is at trade shows or in the boat park and openly talk to everyone and anyone; these conversations can result in interesting and influential chatter which can often drive my passion for designing products that will help others to enjoy what they do the best. All I strive for is to design to meet people's needs and make something that will help and be appreciated.

The development of the Rooster Helmet has been a long process, which sees us delving into a new arena of the high impact foiling market. The development has caused some deliberation amongst our team, trying to predict the future trends of the sailing market.

All our research and development has been done carefully working alongside sailors, ranging from high performance to beginners and sailing schools, along with other regular watersports users to ensure we have a broad understanding of all the design features that are needed.

With our new Helmet, our main aim was to design a product that could be used time and time again with little reduction in performance.

This led many discussions over whether to develop a lightweight high-performance polycarbonate shell with a moulded inner or a more traditional 'indestructible' ABS shell. There are pluses and minuses to both options. We were super keen to ensure the helmet was light to wear, but at the same time durable. We achieved this by using the durable ABS shell in conjunction with a lightweight impact resistant (MISRA) lining that does not absorb water. We think that we have designed the best solution; minimal weight with maximum durability.

The low profile, low bulk helmet has good ventilation with its numerous holes which also helps reduce its overall weight.

Our Comb Helmet is designed so that it can reach a range of users from sailing schools, to high performance sailors, kayakers, wakeboarders and other watersports users. It features a durable hard shell and is certified to CE EN 1385, deeming it safe for watersports applications. An adjustable inner headband enables a secure fit over a variation of head sizes – a great benefit when sharing a helmet amongst family members or groups. Inner cushioned sweat wicking pads of different thicknesses that can be interchanged which further improves the fit.

# TECHNICAL CASUAL

## HOODED TECH SWEATER

**Colour:** Blue

**Size Range:** Junior L, XS, S, M, L, XL, 2XL, 8,10,12,14,16

This durable top serves as a dual purpose sweater/jacket due to its windproof and shower-resistant qualities. The main body is constructed using a 3-layer matrix utilizing a smooth knitted outer surface, soft fleece inner layer and a hidden TPU mid layer; all bonded into 1 single fabric. Contrast hard-wearing stretch panels are added to the side body and inside arm panels to add more flexibility, durability from wear/rubbing.

### Features:

- Full front zip
- Invisible hand pockets at sides
- Hard wearing stretch fabric inside arms and side body panels
- Lighter fabric at side of hood to allow for better hearing
- Wind-resistant
- Adjustable hood through toggles at neck
- Adjustable hem

### Materials:

- 100% Polyester
- TPU Midlayer
- Bonded Fleece Lining

## SOFT SHELL JACKET

**Colour:** Black, Blue

**Size Range:** Junior L, XS, S, M, L, XL, 2XL

The Soft Shell Jacket is a great all-year-round layer that is hard wearing, wind proof and water repellent. Wear it both on and off the water during the summer for protection from spray, rain showers and strong winds. Alternatively it can be worn as a mid-layer in the winter for a heat boost. The Jacket is fleece-lined throughout making it super snug with minimal bulk. The 100% twill polyester stretch bonded fabric with TPU membrane not only makes it flexible but water resistant as well to 8000mm and breathable to 3000 mvp.

### Features:

- Hood with elastic cord adjustment
- Chunky plastic water repellent main zipper
- Soft zipper cover at the top of the neck
- Fleece lined throughout
- Chest pocket with mesh lining
- Fleece lined hand pockets
- Adjustable drawcord around the bottom of jacket
- Adjustable Cuffs with hook and loop closure

### Materials:

- 100% Twill Polyester 8000mm/3000mvp
- Fleece bonded lining

## SOFT SHELL GILET

**Colour:** Black, Blue

**Size Range:** Junior L, XS, S, M, L, XL, 2XL

The Soft Shell Gilet is a great all-year-round layer that is hard wearing, wind proof and water repellent. Team it with a T-shirt both on and off the water during the summer, to keep your core warm and. Wear it as a mid-layer in the winter for a heat boost. The Gilet has a slim-fit cut and is fleece-lined throughout making it super snug and reduces bulk. The 100% twill polyester stretch bonded fabric with TPU membrane not only makes it flexible but water resistant as well to 8000mm and breathable to 3000 mvp.

### Features:

- Slim fit
- Chunky plastic water repellent main zipper
- Soft zipper cover at top of neck
- Fleece lined throughout
- Chest pocket with mesh lining
- Fleece lined hand pockets
- Adjustable drawcord around the bottom

### Materials:

- 100% Twill Polyester 8000mm/3000mvp
- Fleece bonded lining

## SUPERLITE HYBRID

**Colour:** Black

**Size Range:** Junior L, XS, S, M, L, XL, 2XL, 8, 10, 12, 14, 16, 18

Designed to be worn either on its own or as an additional layer underneath your Softshell or sailing jacket, our Superlite Hybrid Jacket will regulate your body temperature with the soft 'down-like' synthetic filling to increase the jackets performance, environmental impact and durability – it doesn't matter if you get wet, the filling will dry the same. The cuffs are made from a water resistant heavy weight Nylon spandex material, hardwearing at parts most susceptible to wear.

### Features:

- Soft comfortable hood with elastic cord adjustment at back
- Durable stretch side panels, underarm panels and cuffs for increased lifetime
- Elastic binding at cuffs and hem for a secure fit
- Stretch chest pocket
- Internal chest pocket
- Hand pockets
- Chunky front zipper
- Soft zipper cover at top of neck
- Water resistant finish to entire jacket

### Materials:

- Main body: 100% 380T Nylon Taffeta
- Cuffs/sleeves/body sides/pocket: 94% Nylon 6% Spandex
- Padding: 100% synthetic down like Polyester

*"Great jacket - using it now as an outer layer but will be perfect as a mid layer for sailing, skiing or pretty much anything"*

- Charlie F -

## SUPERLITE ECO VEST (GILET)

**Colour:** Navy

**Size Range:** Junior, XS, S, M, L, XL, 2XL, 3XL, 8,10,12,14,16,18

This medium-fill padded vest is lightweight and benefits from intelligent panel layout to achieve even padding distribution. Constructed utilising purely recycled fabrics, the soft 'down-like' polyester fill and 20D ripstop nylon contribute to this vests quick drying, durable and comfort properties. It can also be easily stuffed down into its pocket for easy storage and the ideal travel companion!

**Features:**

- Elastic binding at shoulders and hem for a secure fit
- Packable stowaway construction – packs into small internal pocket
- External chest pocket
- Hand pockets
- Soft zipper cover at top of neck
- Slim fit – can be worn as an alternative to a jumper/sweater or as a coat
- Lightweight

**Materials:**

- Main body: Recycled ripstop 20D Nylon
- Padding: 100% synthetic down like Recycled Polyester

## QUICK DRY UVF 50+ TECH T-SHIRT LONG SLEEVED

**Colour:** Blue, Grey, White, Khaki Green

**Size Range:** Junior S, Junior M, Junior L, XS, S, M, L, XL, 2XL

Now made from 100% recycled polyester. Long sleeved medium weight Polyester T-shirt. Quick dry, anti-bacterial and with UVF50+ protection. Perfect multi-sports T-shirt – great for summer days on the water and as a training t-shirt.

**Features:**

- Loose Fit
- Anti Bacterial (minimised odour)
- Quick dry
- UVF50+
- Long sleeved

**Materials:**

- 100% Recycled Polyester

## TECHNICAL POLO

**Colour:** White

**Size Range:** Junior L, XS, S, M, L, XL, 8, 10, 12, 14, 16, 18

Moisture wicking, fast drying technical polo shirt. Available in Mens, Womens and Junior fits. The material is a blend of polyester and elastane with a pique finish, providing moisture wicking, fast drying properties for added comfort against the skin. The button down neck aids quick cooling. Ideal sports top to keep in your kit bag.

**Features:**

- Short sleeved
- Longer back, side slits for better fit

**Materials:**

- Recycled Polyester

## NAVY HOODIE

**Colour:** Navy

**Size Range:** Junior, XS/S, M/L, XL/2XL

A great training essential item, which we've developed utilising recycled coffee grounds in the fabric. The hoodie has a soft fleece brushed inner combined with a durable outer surface fabric to make this slouchy fit hoodie super comfortable and practical.

**Features:**

- Oversized fit
- Hood with Rooster® drawcord adjustment
- Elasticated hem and cuffs
- Kangaroo pocket at front

**Materials:**

- 40% Cotton
- 30% Recycled Coffee Grounds
- 25% Polyester
- 5% Elastane

*"Fantastic Product, it dries out really quickly, gives great uv protection, and is very very comfortable to wear. I will almost certainly be buying a second one."*

- Mike H -

# FOOTWEAR

## GET OUT AND STAY OUT

Try out our Pro Laced Ankle Strap Boot, with extra ankle support or our Low Cut Boot, also exceedingly stable and great for hiking, with extra flex in the sole for trapezing. Our All Purpose Boot has been developed to reduce the stretch between the heel and the upper foot (instep) whilst we have angled the zip to make it easy to put the boot on, so you can still benefit from an easy fitting boot that remains secure.

Combine any Rooster boot with our Pro Plus Padded Toestraps to get grip that is ideal for pointed toe hiking, available for all classes, giving you the confidence of a secure fit.

WATCH VIDEO ABOUT OUR  
HIKING BOOTS AND  
TOESTRAP SYSTEMS

***"Really comfortable  
boot to wear. Gives  
great grip against  
toestraps and also  
on cockpit floor."***  
- Graham S -

## LOW CUT BOOT

**Colour:** Black

**Size Range:** EU: 34, 35, 36, 37, 38, 39, 40.5, 41.5, 42.5, 43.5, 45, 46, 47

The Rooster Low Cut Boot manages to combine lightness and flexibility with comfort and support. The improved wrap-around ribbed sole offers protection and superior grip, which blends over the top of the boot into a super grippy compound which provides extra padding and hiking security where you need it most. The 5mm neoprene has a red, soft, plush lining with a reinforced heel support and pull tab to make it easier to put on and take off. There is an adjustable neoprene ankle strap and soft elastic binding at the top of the boot.

### Features:

- EasiFit; made in a slightly wider fit than the industry average
- Wrap-around ribbed, hard wearing soles
- Plush, thermal lining
- Additional grip and support for hiking
- Neoprene ankle strap and soft elastic binding
- Reinforced heel support and pull tab

## PRO LACED ANKLE STRAP BOOT

**Colour:** Black

**Size Range:** EU: 38, 39, 40.5, 42.5, 45, 46, 47, 49, 51

The Pro Laced Boots have been developed to give the wearer ultimate support for hiking and trapezing. The wrap-around ribbed sole offers protection combined with superior grip, which blends over the top of the boot into a super grippy compound providing extra padding and hiking security where you need it most.

We have used a large gusset to allow for greater ease when putting them on and taking them off. There are strong adjustable laces to accommodate varying ankle and calf sizes and also allow for some freedom of movement at the ankle.

**Features:**

- EasiFit; made in a slightly wider fit than the industry average
- Wrap-around ribbed, hard wearing soles
- Wide neoprene gusset for ease of donning
- Adjustable laces
- Additional grip and support for hiking
- Will suit a wide variety of ankle size and foot width
- Wide removeable Velcro ankle strap

## ALL PURPOSE BOOT

**Colour:** Black/Grey sole

**Size Range:** EU: 34, 35, 36, 37, 38, 39, 40.5, 41.5, 42.5, 43.5, 45, 46, 47, 49, 51

Outstanding sole protection and toe support make this All Purpose boot a must have for all water sports. Its soft lining and wide zippered opening make putting on the boots a breeze, even over a latex dry suit sock. Made utilising our specialist 3D lasts that provide a more stable platform and wider fit than the average wet boot.

**Features:**

- EasiFit; made in a slightly wider fit than the industry average
- Constructed using 90 degree woven 5mm thick neoprene which provides additional stiffness for excellent hiking support whilst retaining and flexibility
- Heavy duty YKK zip for increased durability with a neoprene gusset for comfort and to reduce water ingress
- Fleece-like terry lining for increased insulation which also helps to pull the boots on and off.
- A moulded Velcro tab helps to keep the fastened zip in place
- Hard wearing, ribbed sole for increased grip around the boat and protection on stoney slipways

## POLYPRO® SOCKS

**Colour:** Black

**Size Range:** Junior, 2XS/XS, S/M, ML/L, XL/2XL

Minimalistic lightweight fleece lined socks made using stretchy hydrophobic polypropylene fabric. Perfect to be used on their own for walking, running, etc or as a liner to give a heat boost underneath your sailing, cycling, motorbike, skiing and other socks/boots.

**Features:**

- Breathable polypropylene material wicks moisture away from the body
- Brushed fleece inner
- Quick drying

**Materials:**

- Composition: 94% Polypropylene, 6% Elastane

## HOT SOCKS

**Colour:** Black

**Size Range:** 2XS, XS, S, M, M/L, L, XL, 2XL

A revolution in warmth - a 0.5mm titanium layer that is both comfortable and warm. Wear them under your normal boots for extra warmth - remember layers are better than thickness! Titanium neoprene acts in a similar way to a survival blanket, the titanium impregnated reflective layer is sandwiched between the neoprene and the interior nylon lining, this lining reflects radiated heat back to the body.

**Features:**

- Thin neoprene socks with 0.5mm Titanium impregnated reflective layer
- Provide additional warmth by reflecting heat back to the body
- Layer up with PolyPro Socks

**Materials:**

- Titanium lined 0.5mm neoprene

## THERMAFLEX® 2.5MM SOCKS

**Colour:** Black

**Size Range:** Junior, 2XS/XS, S/M, ML/L, XL/2XL

Rooster ThermoFlex® 2.5mm Neoprene Wet Socks are our softest and stretchiest socks meaning they can span several shoe sizes. This makes it easier for you to find the correct size for your foot and a closer fit means warmer feet! The size chart shows the suggested size for each of these socks, allowing you to pick the one you require. Laundry instructions - we recommend hand washing in warm soapy water and allowing to air dry.

**Features:**

- Super stretchy comfortable lining
- Snug fit next to skin
- Flatlock stitching

**Materials:**

- ThermoFlex® 1.5mm Super Stretch Neoprene
- ThermoFlex® soft lining

## SUPERTHERM® SOCKS

**Colour:** Black

**Size Range:** Junior, 2XS/XS, S/M, ML/L, XL/2XL

Designed to keep your feet SUPER warm! The superstretch neoprene outer allows these socks to span several shoe sizes making it easier for you to find the correct size - a closer fit means warmer feet! Inside the sock there is a super soft, grey marle, quick-dry lining which not only improves the thermal qualities of the sock, it also feels very soft and comfortable next to your skin. The sock is glued and blind-stitched to prevent cold water flushing, with a comfortable seam layout designed to maximise comfort when wearing.

**Features:**

- 4mm superstretch neoprene
- Plush, thermal, quick-dry lining
- Glued & blind stitched

# GLOVES & LINERS

*"These are gloves are ingenious! I use the 'stow away mit' to protect my fingers from the chill before the race, quick to use. These gloves are fantastic they keep my hands warm throughout the winter."*  
- Sam W -

## COMBI GLOVES

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

**ROOSTER**  
AQUAFLEECE

We have combined the insulating qualities of our All Weather Neoprene glove with the wind protection properties from our AquaPro glove to create the ideal winter glove. The glove has full fingered neoprene protection that extends further up the wrist to increase blood flow and circulation combined with a tuck away Aquafleece mitten - this can then tuck away neatly into a handy pocket on the top of the glove when not in use. The pocket for the mitten to tuck into can also double up as a storage pocket for heat pouches!

### Features:

- Tuck away Aquafleece mitten
- Super Grip coated palms
- Velcro wrist fastenings for added security and to reduce water ingress
- 3D shaped palm and fingers
- Individual finger reinforcement
- Seamless wraparound grip for comfort

### Materials:

- 34% Nylon
- 27% Polyester Fleece
- 25% Amara
- 14% PU

## AQUAPRO GLOVES

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

**ROOSTER**  
AQUAFLEECE

Longer lasting 'Super Grip' coated palm and velcro strap fastener around the wrist. This 'top of the range' glove virtually eliminates the wind chill experienced with neoprene gloves whilst still giving the user the control and feel that you would expect from a top product.

### Features:

- Aquafleece material - developed using the same principles as the Aquafleece®
- Combines the wind protection of a Polyurethane outer layer with the insulation of a fleece inner layer
- Super Grip coated palms
- 3D shaped palm and fingers
- Velcro wrist fastenings for added security and to reduce water ingress
- Seamless wraparound grip for comfort

### Materials:

- 57% Polyester, 14% PU, 23% Amara, 5% Neoprene, 1% Nylon

## ALL WEATHER NEOPRENE GLOVES

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

Every aspect of the design has been thoroughly considered. Using only the finest Japanese grip on the palms/fingers, top rated abrasion resistant Amara in places where supple durability is required. Despite being full fingered, this neoprene glove's pre-shaped cut/construction offers the wearer the dexterity required to race a small sailboat to the top level.

### Features:

- All weather construction is warm enough for sailing in the depths of winter whilst flexible
- 3D shaped palm and fingers
- Individual finger reinforcement
- Seamless wraparound grip for comfort
- Top rated abrasion resistant Amara
- Japanese crafted, supple yet durable grip

## PRO RACE 5 GLOVE

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

5 finger cut gloves. Every aspect of the design has been thoroughly considered. Using only the finest Japanese grip on the palms/fingers, top rated abrasion resistant Amara in places where supple durability is required and with pre-shaped cut/construction for total comfort. The fastening around the wrist is ideally shaped and positioned to avoid collision with your watch strap, and is made additionally secure with its fail safe tab

**Features:**

- 3D shaped palm and fingers
- Individual finger reinforcement
- Unrestrictive stretch panels across back of hand
- Seamless wraparound grip for comfort
- Top rated abrasion resistant Amara
- Fail-safe tab on wrist closure
- Japanese crafted, supple yet durable grip

**Materials:**

- 54% Neoprene , 40% Amara, 6% Nylon

## PRO RACE 2 GLOVE

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

2 finger cut gloves. Every aspect of the design has been thoroughly considered. Using only the finest Japanese grip on the palms/fingers, top rated abrasion resistant Amara in places where supple durability is required and with pre-shaped cut/construction for total comfort. The fastening around the wrist is ideally shaped and positioned to avoid collision with your watch strap, and is made additionally secure with its fail safe tab

**Features:**

- 3D shaped palm and fingers
- Individual finger reinforcement
- Unrestrictive stretch panels across back of hand
- Seamless wraparound grip for comfort
- Top rated abrasion resistant Amara
- Fail-safe tab on wrist closure
- Japanese crafted, supple yet durable grip

**Materials:**

- 54% Neoprene , 40% Amara, 6% Nylon

## DURA PRO 5 GLOVE

**Colour:** Grey/Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

5 finger cut gloves. Double layer top quality abrasion resistant Amara on all high load/stress areas, these gloves are extremely supple with excellent grip and are perfect for all helming duties. Using only top rated abrasion resistant Amara in places where supple durability is required and with 3D shaped cut/construction for total comfort. The fastening around the wrist is ideally shaped and positioned to avoid collision with your watch strap, and is made additionally secure with its fail safe tab.

**Features:**

- 3D shaped palm and fingers
- Individual finger reinforcement
- Unrestrictive stretch panels across back of hand
- Seamless wraparound grip for comfort
- Top rated abrasion resistant Amara
- Fail-safe tab on wrist closure
- Perfect for mainsheet trimming

**Materials:**

- 71% Nylon, 23% PU , 3% Polyester , 3% Neoprene

## DURA PRO 2 GLOVE

**Colour:** Grey/Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

2 finger cut gloves. Double layer top quality abrasion resistant Amara on all high load/stress areas, these gloves are extremely supple with excellent grip and are perfect for all helming duties. Using only top rated abrasion resistant Amara in places where supple durability is required and with 3D shaped cut/construction for total comfort. **Features:**

- 3D shaped palm and fingers
- Individual finger reinforcement
- Unrestrictive stretch panels across back of hand
- Seamless wraparound grip for comfort
- Top rated abrasion resistant Amara
- Fail-safe tab on wrist closure
- Perfect for mainsheet trimming

**Materials:**

- 71% Nylon, 23% PU , 3% Polyester , 3% Neoprene

## POLYPRO® GLOVE LINERS

**Colour:** Black

**Size Range:** Junior, XS/S, M/L, XL/2XL

Minimalistic lightweight fleece lined glove made using stretchy hydrophobic polypropylene fabric. Perfect to be used on their own for walking, running, etc or as a liner to give a heat boost underneath your sailing, cycling, motorbike, skiing and other gloves.

**Features:**

- Breathable polypropylene material wicks moisture away from the body
- Brushed fleece inner
- Quick drying

**Materials:**

- Composition: 94% Polypropylene, 6% Elastane

## HOT HANDS GLOVE LINERS

**Colour:** Black

**Size Range:** 3XS, 2XS, XS, S, M, L, XL, 2XL

Minimalistic lightweight titanium lined 0.5mm neoprene glove. Being made from neoprene, these gloves will give provide some insulation, where the titanium impregnated reflective lining reflects heat back to your body - in a similar way to a survival blanket. Perfect to be used on their own for cycling, walking, running, etc or as a liner to give a heat boost underneath your sailing, cycling, motorbike, skiing and other gloves.

**Features:**

- Flexible, adaptable, neoprene gloves with 0.5mm Titanium impregnated reflective layer
- Ideal layer to wear beneath AquaPro gloves or on their own for an extra layer of warmth in the colder months

**Materials:**

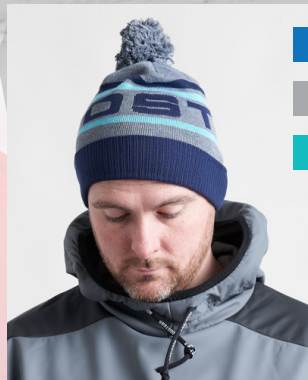

- Composition: 65% Neoprene, 35% Nylon

# HEADWEAR & ACCESSORIES

KEEPING WARM

## RECYCLED KNIT BEANIE

**Colour:** Blue/Navy, Grey/Navy, Teal/Blue

**Size Range:** One Size

Retro bobble beanie with Rooster name in weave. Made from double lined 100% Recycled Polyester (recycled plastic bottles).

### Features:

- Ribbed headband/cuff
- Double lined for added warmth
- Bobble / Pom-pom styling
- Naturally hydrophobic and quick-drying

### Materials:

- 100% Recycled Polyester

We have utilised recycled polyester in some of our products to as a step towards our long term sustainability plan, where we aim to reduce impact on the environment by minimising our dependence on some traditional raw materials that can release harmful chemicals and emissions. Recycled polyester is made from consumer recycled plastic items such as single use plastic bottles and other plastic packaging.

## HEADWEAR & ACCESSORIES

## FISHERMAN MERINO HYBRID KNIT BEANIE

**Colour:** Navy Blue

**Size Range:** One Size

Double layer beanie constructed from a Merino Wool and recycled Polyester blend. Merino wool is naturally insulating through hollow fibres and is naturally antimicrobial, whereas the recycled Polyester is naturally hydrophobic and quick drying, making the perfect combination for a comfortable and warm winter beanie.

### Features:

- Ribbed headband/cuff
- Textured knit top part
- Double layer construction

### Materials:

- 90% Recycled Polyester
- 10% Merino Wool

## MERINO HYBRID KNIT BEANIE

**Colour:** Grey

**Size Range:** One Size

Chunky Knit single layer beanie constructed from a Merino Wool and recycled Polyester blend for a lightweight, fast drying warm beanie.

Merino wool is naturally insulating through hollow fibres and is naturally antimicrobial, whereas the recycled Polyester is naturally hydrophobic and quick drying, making the perfect combination for a comfortable and warm winter beanie.

### Features:

- Ribbed headband/cuff
- Wide and chunky knit top part
- Naturally hydrophobic and quick drying

### Materials:

- 90% Recycled Polyester
- 10% Merino Wool

## AQUAFLEECE® NECK GAITER

**Colour:** Black, Blue, Teal, Flo Yellow, Khaki Green, Orange, Navy, Pink

**Size Range:** One Size

Inspired by water, the AquaFleece® Neck Gaiter uses a combination of AquaFleece® and PolyPro™ to make this a must have watersports accessory, providing protection from the elements without compromising comfort. Its multifunction design enables it to be worn as a neck gaiter, a beanie or a balaclava.

### Features:

- Three products - a neck gaiter, beanie and balaclava - for the price of one!
- AquaFleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
- Adjustable drawstring allows a customised fit
- The perfect accessory for any outdoor activity including sailing, cycling, motorcycling, walking, skiing and snowboarding.

## AQUAFLEECE® BALACLAVA

**Colour:** Black, Black/Flo Yellow

**Size Range:** One Size

Inspired by water, the AquaFleece® Neck Gaiter uses a combination of AquaFleece® and PolyPro™ to make this a must have watersports accessory, providing protection from the elements without compromising comfort.

### Features:

- Minimalistic design well suited to fit underneath any type of helmet
- AquaFleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
- The perfect accessory for any outdoor activity including sailing, cycling, motorcycling, walking, skiing and snowboarding.

## PRO AQUAFLEECE® BEANIE

**Colour:** Blue, Black, Black/Flo Yellow

**Size Range:** S, M, L, XL

Combining the thicker Pro AquaFleece® fabric together with taped seams that helps to lock in the heat to your head.

Wind chill protection is provided in abundance by the Pro AquaFleece® and the taped seams add security and prevent flushing through the seams.)

### Features:

- Upgraded fleece lining from the standard AquaFleece
- Taped seams to minimise water ingress
- Secure internal loop for attaching the Rooster Cap Leash

## AQUAFLEECE® BEANIE

**Colour:** Grey, Teal, Khaki Green, Orange, Navy, Pink

**Size Range:** S, M, L, XL

Made from the same material as our famous AquaFleece tops - Polyurethane coating on the outside combined with a fleece inner layer, a combination that virtually eliminates windchill and hence is very warm.

### Features:

- AquaFleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
- Secure loop for attaching Rooster Cap Leash

## AQUAFLEECE® HEADBAND

**Colour:** Black, Blue, Teal, Flo Yellow, Khaki Green, Orange, Navy, Pink

**Size Range:** One Size

Featuring AquaFleece® construction to provide wind protection to the front and sides of the head, protecting the ears and reducing heat loss in from wind chill. 'Fit' is taken care of by the integrated PolyPro™ stretch panel, worn at the rear to allow different size heads and hair styles to be accommodated, whether you wear your hair up or down.

### Features:

- AquaFleece material provides excellent water proofing and wind resistance, combined with the breathability of PolyPro™
- PolyPro™ stretch panel

## SUPERTHERM® BEANIE

**Colour:** Blue/Black, White/Black, Azure, Constellation Grey

**Size Range:** One Size

By removing the traditional black jersey outer lining of our Supertherm® neoprene we have created a softer and stretchier Beanie with all the thermal properties that neoprene foam provides. The resulting garment provides an excellent fit, warmth and comfort next to your skin. The band around the head is double thickness to provide a secure fit and additional warmth around the forehead and ears. The single thickness fabric over the top of the head has more give and stretch for a proper fit. There is an elastic loop attachment point on the Beanie so that you can secure it to your clothing.

### Features:

- Elastic loop attachment
- Stitching at back to allow for optional cut for ponytail
- 4/2mm 4-way superstretch neoprene
- Plush, quick-dry lining

# HEADWEAR & ACCESSORIES

KEEPING THE SUN OFF  
AND STAYING COOL

## QUICK DRY VISOR

**Colour:** Black, Red, Navy Blue

**Size Range:** One Size

Quick Dry Visor with contrast black back mesh panel and rooster styling, available in Black, Red or Navy Blue.

Inner sweat absorption band, adjustable back closure and reflective brim make the visor an on-the-water must-have.

**Features:**

- Loop at back for Cap retainer/rope to be attached to
- Integrated headband for heat and moisture transport
- Adjustable suspension back closure to ensure a close fit.
- Safety reflective brim and back closure detail

## WIDE BRIMMED UV HAT

**Colour:** Blue, Grey

**Size Range:** S/M, L/XL

Designed with water sports in mind - this Wide Brimmed Hat's high uv rating and quick dry properties sets it out from the crowd.

**Features:**

- Integrated lycra headband for heat and moisture transport
- Comfortable four panel construction
- Made from Rooster AeroMesh fabric for maximum breathability and minimal moisture retention.
- Adjustable suspension back closure to ensure a close fit.
- Safety reflective brim and back closure detail
- UV50+

## STRUCTURED CAP

**Colour:** Black, Grey, Navy Blue

**Size Range:** One Size

Structured peak cap with contrast black back mesh panel and Rooster styling, available in Black, Grey or Navy Blue.

Inner sweat absorption band, adjustable back closure and a reflective brim make this cap a must-have for on and off the water.

**Features:**

- Loop at back for Cap retainer/rope to be attached to
- Integrated headband for heat and moisture transport
- Adjustable suspension back closure to ensure a close fit.
- Safety reflective brim and back closure detail

## AEROMESH CAP

**Colour:** Black, Grey, Blue

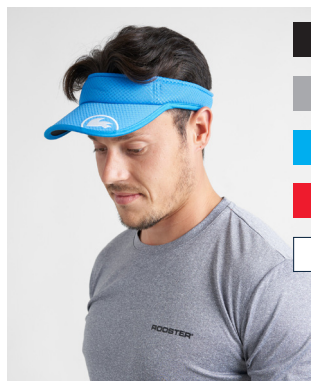

**Size Range:** One Size

Suitable for a variety of outdoor activities. The features of the Aeromesh Cap caps ensure a comfortable fit whilst delivering performance in use.

**Features:**

- Integrated lycra headband for heat and moisture transport
- Comfortable four panel construction
- Made from Rooster AeroMesh fabric for maximum breathability and minimal moisture retention.
- Adjustable suspension back closure to ensure a close fit.
- Safety reflective brim and back closure detail

## AEROMESH VISOR

**Colour:** Black, Grey, Blue, Red, White

**Size Range:** One Size

Rooster Visor, designed to keep the sun out of your eyes and your head cool.

Designed for water sports use with a plastic reinforced peak and adjustable head band.

**Features:**

- Integrated lycra headband for heat and moisture transport
- Comfortable construction
- Made from Rooster AeroMesh fabric for maximum breathability and minimal moisture retention.
- Adjustable suspension back closure to ensure a close fit.
- Safety reflective brim and back closure detail

## UV NECK SLEEVE

**Colour:** Blue, Grey, Azure, Seagrass

**Size Range:** One Size

Lightweight, breathable, moisture wicking, seamless design for extra comfort.

Multifunctional; can be worn as cosy neck sleeve, headband, hair band, whatever floats your boat.

**Materials:**

- 150 gsm polyester

## CAP LEASH HAT RETAINER

**Colour:** Black

**Size Range:** One Size

Featuring a durable webbing leash with zero corrosion fixtures at each end. The damage free secure grip will ensure that you never loose your hat again.

Overall length 30cm (approx)

**Features:**

- Improved closure points with extra grip
- 30cm length (approx)
- Minimalistic Rooster design

## SPORTS SUNGLASSES STRAP

**Colour:** Black

**Size Range:** One Size

The elasticated strap combined with cylindrical rubber inserts and adjustable toggle provides a secure and unrestrictive solution to keeping your glasses in place.

**Features:**

- Elasticated strap
- Adjustable toggle to secure to head
- Compact rubber sunglass grips
- Comfortable fit
- Minimalistic Rooster design

## MICROFIBRE QUICK DRYING TOWEL

**Colour:** Black, Azure

**Size Range:** One Size

This towel is an ideal partner in your kit bag. Now even bigger, yet small enough to fit neatly into the tiniest space in your bag. Its microfibre construction offers you an amazing drying ability and its thickness ensures that it dries fast in normal conditions to ensure you have a odour free towel for longer.

**Features:**

- Size: 1.6m x 0.8m (Approx Large Bath Towel)
- Hanging loop on one corner
- Washing instructions: 30 degrees without fabric conditioner

# BAGS & HOLDERS

*"Great sailing bag. I love the internal mesh pockets and the colour blue."*

- Jenna -

## 90L CARRY ALL

**Colour:** Blue

**Size Range:** 90L

This 90L bags features a separate wet compartment, which is taped and completely waterproof, and four external mesh pockets on the outside. A superb, multi-functional bag.

**Features:**

- Padded detachable shoulder strap
- Lockable heavy duty YKK® zips on the main compartment
- Internal mesh pockets
- Separate wet compartment
- Four external mesh pockets

## CARRY ALL (INC. STRAP) - 60L

**Colour:** Black, Blue

**Size Range:** 60L

This 60L bags features a separate wet compartment, which is taped and completely waterproof, and four external mesh pockets on the outside. A superb, multi-functional bag.

**Features:**

- Padded detachable shoulder strap
- Lockable heavy duty YKK® zips on the main compartment
- Internal mesh pockets
- Separate wet compartment
- Four external mesh pockets

## ROLL TOP WELDED DRY BAG - 60L

**Colour:** Black, Khaki Green

**Size Range:** 60L

With one huge 60L compartment, you will be sure to fit all your kit inside. It is made from 500D PVC Mylar material which makes it very durable against everyday wear and tear. Perfect for long days on the water or for keeping all your wet kit in so that the car doesn't get wet!

**Features:**

- Completely waterproof dry bag construction with welded seams
- 2 Removable shoulder straps with adjustment
- Strong 'D' ring attachments
- One large compartment
- A top entry with buckle closure
- Durable outer material
- Dimensions: (Measured flat) Width: 500mm, Length: 780mm

**Materials:**

- 500D PVC Mylar with string inside

## ROLL TOP DRY BAG - 10L

**Colour:** Blue, Red, White

**Size Range:** 10L

Made from 500D PVC this simple bag offers you the easy way to take your spares, food and warmer clothing on the water. Clips around your toetrap. Comes with a detachable shoulder strap.

Dimensions (flat) are 46cm long x 30.5 wide.

**Features:**

- One large compartment
- Window to view items
- Black base fabric – less likely to mark
- Detachable shoulder strap with adjustment

## WATERPROOF BACKPACK

**Colour:** Black

**Size Range:** 30L

This bag includes a neoprene self-draining water bottle holder on one side, with a mini dry bag compartment on the other. The front of the bag has an elastic draw cord. On the back of the bag you will find shoulder straps, a padded removable waist strap with lumbar support and a grab handle. Inside the main compartment of the bag the seams are taped and reinforced and there is another small zip pocket for putting valuables in so that they are easy to find when you need them.

**Features:**

- Completely waterproof dry bag construction with taped seams
- Neoprene, self-draining water bottle holder
- Mini outer dry bag compartment
- Elastic draw cord
- Padded Shoulder straps
- Padded removable waist strap with lumbar support
- Internal zip pocket

**Materials:**

- 95% PVC, 5% Nylon

## LAPTOP BACKPACK

**Colour:** Black

**Size Range:** 25L

Made from hard-wearing Ripstop Polyester, this bag offers a durable multi-functional solution ideal for school, work and travelling. This bag has plenty of compartments for all your needs. Large main pocket with an internal zipped compartment for small items – pens, phone, keys. A separate zipped compartment at the back makes putting your notebooks/laptop in and out easy in and out easy with the long length zipper extending to the base of the bag – ideal for airport security. Can fit laptops up to 15" x 10" (laptop pocket dimensions are 34.93cm x 24.07cm x 1.55 cm).

**Features:**

- Separate Zipped compartment at back with padded sleeve for Laptop
- Internal stretch pocket for note books or tablet
- Microfibre lined sunglasses top pocket
- Large main compartment with zipped pocket and essentials divider
- Stretch mesh front pocket
- Side zipped pocket
- Drinks bottle holder

## SPLICING TOOL KIT BAG

**Colour:** Blue

**Size Range:** Length approx. 33cm, Width approx. 23.5cm, Thickness when empty Approx 1.5cm

This little bag will hold all the tools you will ever need for bimbly ropes on small boats. There's a built in pin cushion for your needles and for your scissors, whipping twine, push fids, pull fids, palm, Needle Fid, gas torch and multi-tool.

## WATERPROOF PHONE CASES

**Colour:** Transparent/Black

**Size Range:** 105mmx145mm, 105mmx175mm, 105mmx195mm, 130mmx230mm

The ideal solution to keep your phone or personal belongings dry while on the water. Simple to use and suitable for most low impact surface water sports, The Rooster Waterproof Case provides adequate protection from water ingress, allowing you to use your device while on the water.

**Features:**

- Maintain use of your phones features while protecting from the elements
- Detachable lanyard
- Durable yet tactile TPU construction
- Simple rotary closure system
- ClearView™ windows to front & rear
- Suitable for most surface water sports
- Waterproof rated to IPX:7 (stays dry up to 3 metres for 1 hour)

## JOEY BOTTLE HOLDER

**Colour:** Black

**Size Range:** One Size

Neoprene sleeve bottle holder with adjustable webbing straps at each end to fit around different circumferences of tube. Can be attached to parts in the boat to store drinks when sailing. The bottle holder features an oval hole to be able to slide the bottle in with one hand. Can fit up most bottle up to 1L in size.

**Features:**

- Adjustable velcro webbing straps to wrap around most circumferences
- stretchy neoprene sleeve
- secure yet stretchable elasticated opening to easily retrieve bottle
- suitable for most bottles from 700ml-1L

## SPORTS DRINK BOTTLE '99 (710ML)

**Colour:** Transparent/Black

**Size Range:** 710ml

Keep hydrated and limit single use plastic with our bottle!

Suitable for any occasion, our durable 710ml capacity drinks bottle has an ergonomic nozzle for easy drinking and increased water flow. The clear and flexible Polypropylene bottle allows you to see how much drink you have left and the shape allows for rope or elastic to be tied around it to secure to your boat or board. We've also added a funky graphic to make you stand out!

**Features:**

- Ergonomic shape to allow rope/elastic to be tied around for secure attachment
- 710ml capacity
- Clear to see amount of fluid left
- Measurement marks on bottle
- Secure nozzle, allows large water flow
- Composition: 100% Polypropylene

# Towel dry, Air dry, Quick dry Poncho

BOAT PARK - CAR PARK - BEACH - BATHROOM

## MICROFIBRE QUICK DRY PONCHO

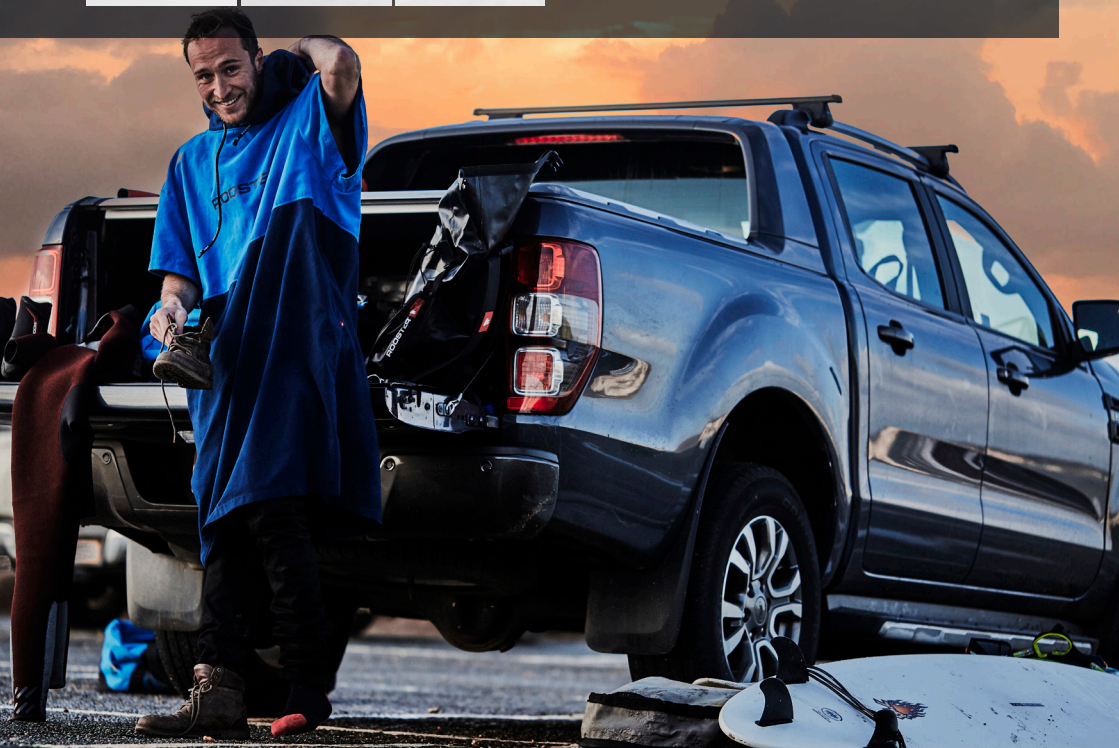

**Colour:** Blue/Navy

**Size Range:** Baby/Toddler, Junior, Adult

The Rooster Quick Dry Microfibre Poncho is small enough to fit neatly into the smallest space left in your kit bag, tucking neatly into its hood. Its microfibre construction has an amazing quick-dry drying ability and its thickness ensures that it dries fast in normal conditions to ensure you have an odour free Poncho for longer.

**Materials:**

- Microfibre quick-dry material
- Composition: 100% Polyester

*"EXCELLENT VALUE AND QUALITY, I bought this for outdoor swimming but used it for sailing first as the changing rooms are closed. It will be perfect for both. Far cheaper than a dry robe and more usable."*

# TILLERS & EXTENSIONS

Rooster carbon tiller extensions are made via metal mandrill. The strength of the Rooster design is not only in the unidirectional fibres but, more importantly in the 45 degree twill around the outside. This is rolled onto the mandrill at the end, which is then heated and pressed. The twill enables the extension to hold and maintain it's circular shape, notably a circle has no weak point, so in maintaining it's shape the extension will remain strong and intact.

**ROOSTER® CARBON TILLER

# ROPE

THROUGH INCREDIBLE PASSION BORDERING ON OBSESSION, FOR MANY YEARS AT ROOSTER® WE HAVE BEEN INNOVATING AND TWEAKING ALL DIFFERENT KINDS OF ROPE.

What began as some of the most used dinghy sailing rope in the world has propagated into lines and rope used for yacht sailing, kitesurfing and windsurfing to name a few. We take immense care and pride in our rope innovations, testing it ourselves regularly and are always on hand for any advice you might need.

## SPECTWELVE

Spectwelve is UHMwPE (Ultra-High-Molecular-weight-Polyethylene) is commonly sold under the brand name Dyneema® or Spectra® and it also known as HMPE. Spectwelve has been pre stretched and has a UV protective coating.

## ZERO

When UHMwPE fibre has been yarn dyed, pre stretched and heat treated to align the fibres for the strongest and least creep properties of any UHMwPE fibre we call it Zero. The colour will not fade with Zero. You will not be disappointed with the strength of Zero.

# MATERIALS TECH.

## POLYPRO™

Our signature base layer fabric constructed from a combination of Polypropylene (94%) and Elastane (6%). The inner surface is brushed to give a thick thermal fleece layer against the skin. Polypro™ is naturally hydrophobic, which means it feels dry against the skin even when wet, making it a great base layer.

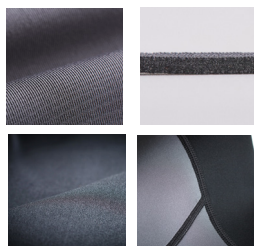

## SUPERTHERM®

Our warmest collection based around a 4mm superstretch neoprene in combination with some other thicknesses on specific panels where more stretch or movement is required. We combine this with different linings and outer surface fabrics to give the best performance. Supertex® products are Glued Blind Stitching (GBS) to increase warmth and minimise water ingress through the seams.

## THERMAFLEX®

Our mid-lightweight neoprene collection ideal for temperatures ranging from 12-20 degrees Celcius. The Thermaflex range uses 1.5mm superstretch neoprene. We combine the superstretch neoprene with several different linings and outer surface fabrics to give the best performance in our products. All Thermaflex products use Flatlock stitching for added durability and to assist in breathability.

## DURATEX™

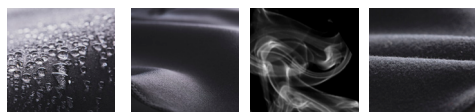

Duralex™ is our premium quality high wearing protective fabric that we use on the seat and knee parts on most of our suits. On our standard products we laminate the Duralex™ with a neoprene mid layer and a nylon inner fabric. When used on the seat panel of all our suits, we always combine it with a plush inner fabric so that our Pro Hike pads can be attached on the inside.

We are also able to use Duralex™ on our Exofleece range as the fabric itself is neoprene free and we laminate it onto a specially developed neoprene free PU foam along with a plush inner fabric. This synthetic PU foam does not use the accelerants used in neoprene manufacture that trigger allergic reactions making this a safe alternative.

## EXOFLEECE®

Our 100% neoprene free collection ideal for warmer climates of temperatures over 15 degrees Celcius. It can also be used in cooler temperatures by adding a Polypro™ base layer for a heat boost. The Exofleece range uses a 1.2mm breathable and durable nylon based fabric with a PU membrane and a soft brushed fleece lining, which creates windproof protection, whilst regulating temperature and wicking away excess moisture from the skin. We have applied a durable water repellent (DWR) treatment to the outer surface to minimise water absorption and reduce wind chill further. We combine this main fabric with our specially developed lightweight PU foam and Duralex on the high wearing areas to provide more protection.

## HOT STUFF - 0.5MM NEOPRENE

Originally designed to work as a heat boosting base layer, this 0.5mm titanium lined neoprene is a clever material that works with your body to regulate your temperature. The titanium lining reflects heat from your body back onto your body, rather than letting it escape through the fabric. This fabric is featured on a range of our liners and base layers, under the 'Hot' name. It's a great heat boost to wear under your other neoprene layers, gloves or socks/boots or on it's own in the summer.

## M.I.S.R.A (IMPACT PROTECTION)

Mouldable Impact Shock Resistant Armour. This is the foam that we use in all of our impact wear, including the Harness, Helmet and Knee Pads, amongst others. It has excellent shock absorption properties and minimal water absorption, allowing us to produce M.I.S.R.A in thin sheets whilst still maintaining its performance.

There are 2 different densities of M.I.S.R.A that we use, one is a bit softer and more cushioning next to the body, whereas the other one is harder and can absorb and higher density making it perfect for absorbing high shock. In some of our products we use a combination of the 2 to give the best all round protection.

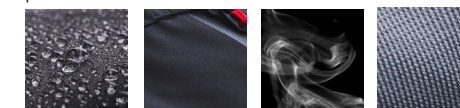

## PASSAGE 3L

Our Passage collection uses a 3 layer construction, laminating Nylon Taslon with a TPU membrane and 20D Polyester Tricot to create 1 combined fabric. There is also a durable water repellent (DWR) treatment applied to the fabric to improve its performance further. The TPU membrane acts as a barrier to ensure that the fabric is highly waterproof, whilst the outer surface provides durability and protection to the membrane and the inner layer acts as a moisture wicking surface to take moisture away from the skin.

We use the highest quality Hipster Tapes to laminate over all the seams to ensure that no water will penetrate through.

We combine the 3L fabric with Cordura on some panels of the Passage range to enhance the technical performance of our products.

## PRO RASH

Pro rash uses mainly heavy duty Nylon Spandex (420gsm) to provide more compression and support on our technical garments. The fabric has got UV50+ protection, and we often combine it with neoprene/Duralex panels to make our products perform further.

## RASH

Our standard Nylon Spandex fabric used on our rash vests. This fabric has a UV50+ rating to ensure maximum protection from UV rays.

## HIPSTER TAPES

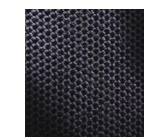

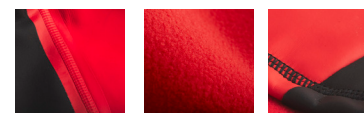

Hipster® is a professional tape manufacture who specialise in producing sealing tapes for outdoor apparel. They are a bluesign® approved company meaning that they are focused on a sustainable future.

## AQUAFLEECE®

Where it all began! The Rooster Aquafleece® is one of our best sellers. The fabric is PU (polyurethane) coated fleece that is fully waterproof, durable and flexible, whilst the brushed fleece inner surface makes it super comfortable. We produce our Aquafleece® fabric in 2 different weights (over several colours):

1. 'Pro' - heavier weight for added warmth in cold conditions. We always tape the seams on our 'Pro' Aquafleece® products to ensure complete waterproof protection.

2. 'Classic' - a slightly lighter weight Aquafleece® fabric. We use this on our classic and pro lite Aquafleece® products, and leave the seams untaped for increased breathability and lower weight for warmer conditions.

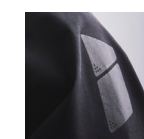

## CORDURA®

Cordura® is a registered manufacturer for highly durable, high wearing fabrics, used in the military and in other high abrasion applications. We use Cordura® Nylon66 on the seat and knees. We treat this fabric with a DWR treatment to make it water repellent and last longer.

## 3M™ SCOTCHLITE™ REFLECTIVE PRINTS

3M™ Scotchlite™ are a registered product produced by 3M™ who specialise in products including reflective and retroreflective products. We have used reflective prints on areas where visibility is important - such as the upper arms and hood.
